MODELS OF MODERN EDUCATIONAL INSTITUTIONS. THEY RANK AMONG THE BEST IN OREGON—REOPEN FOR ANOTHER SCHOOL YEAR NEXT MONDAY WITH A FULL COMPLEMENT OF COMPETENT INSTRUCTORS AND FLATTERING PROSPECTS—NEW DEPARTMENTS ADDED—LIST OF TEACHERS.

COURSE IS A COMPLETE ONE

MARSHFIELD SCHOOLS WILL AFFORD MANY ADVANTAGES TO THE YOUNG PEOPLE AS A RESULT OF PROGRESSIVE METHODS ADOPTED.

School opens for year 1910-1911 on Monday, September 19, 1910, in Marshfield, offering to the pupils the following:

A modern building, splendidly equipped with physical, chemical and domestic science laboratories, good working library, fine commercial department. Wide choice of work in four courses—classical, scientific, English and commercial; electives offered in domestic science. Excellent faculty of college and university grad-

Latin and scientific courses, while the English course will afford a good, practical working foundation for those who do not anticipate pursuing their studies farther than the High School.

All girls and boys who enjoy knowing how to cook when camping days arrive, may take advantage of the excellent courses in domestic science.

The board urges that all students who enroll in the High School next Monday morning should do so with a clearly defined idea of what they are aiming for. Their parents are requested to give this matter their personal attention. Teachers will be glad to co-operate with parents in getting pupils started right.

Domestic Science Department.
The work of this department being somewhat new to the patrons of Marshfield schools, a general knowledge of what the course consists of may be of interest. The following brief outline has been prepared by Miss Kaufmann and is here given for publication:

Work in the domestic science de-

partment will extend through the sixth, seventh, eighth, ninth, tenth and eleventh grades. In the sixth grade the girls will spend eighty minutes each week knotting, braiding, netting, weaving simple baskets of reed, raffia and splint, and doing other hand work. The principles thus learned will be applied in making useful articles. The purpose of this work is to develop more fully the power of motor control and coordination, and to give the child a better understanding of the familiar things about her in the home and elsewhere. This course introduces many of the underlying principles of sewing, which is begun in the seventh grade (see outline of course below).

In the eighth grade the child devotes eighty minutes each week to housekeeping and cookery. She is taught the care of cooking utensils, metals, glassware and of finished and unfinished woods. She learns how to sweep and dust properly; studies the construction and care of gas and coal ranges, the kinds of fuel used, and the correct method for building and banking fires, house furnishings and care of the dining room, bedroom and bathroom are taken up. In addition, the course embraces laundry work. In cookery, milk, eggs, fruits, vegetables and cereals are included in both theory and practice.

During the first year in high school the girls continue the sewing (see course below). Cookery is again taken up in the second year. This course includes breadmaking, preparation of meats, fish and poultry, fruit canning and preserving and cake baking; and the study of leavens, spices, sugars, gelatine, food principles, food values, dietaries, etc. Upon completing the sophomore year the student has acquired sufficient technique to cope with any problem in the kitchen, as well as to produce dishes that will please the fastidious; and she has at the same time received training of excellent educational value.

The whole domestic science course is planned so that each year's work follows in logical sequence that of the preceding year, and gives the student not only educational advantages, but makes her a better home-worker.

Following is the course in sewing:
SEVENTH GRADE.
First Semester (80 minutes per week)
Simple stitches.—Running stitch,

even basting, overhanding, buttonholing raw edges, backstitch, outline stitch.

Articles made.—Needle book and pin cushion, or oven cloth and dish cloth.

Second Semester.
Simple stitches continued.—Uneven basting, hemming, overcasting, buttonhole, gathering.

Articles made by hand.—Cap and apron, for cooking equipment.

FRESHMEN.
First Semester (5 periods per week).
Learning the use of patterns.

Articles made by hand.—Suit of undergarments.

Articles made by machine.—Petticoat and nightgown.

Theoretical work.—Study of emery and manufacture of needles; history, use and care of sewing machines; cotton, growth and manufacture of cotton thread and fabrics.

Second Semester.
Articles made by machine.—Kimono and shirt waist suit (of wool or cotton).

Mending.—Hemmed patch, over-

hand patch, darning with the web stitch.

Theoretical work.—Study of linen; growth of flax and manufacture of linen thread and materials.

JUNIORS.
First Semester (5 periods per week).
Drafting patterns and fitting garments.

Practical work.—Drafting patterns for sleeve, collar, front and back of waist and gored skirt.

Article made.—A gored skirt.

Theoretical.—Study of silk and other materials; laces and trimmings.

Second Semester.
Fine handwork, consisting of embroidery and fine needle work.

Practical work.—Fine handkerchief, baby dress, article in embroidered linen.

Theoretical.—Study of embroideries.

Teachers and Their Assignments.
The teachers of the Marshfield schools for the ensuing year with their assignment of work are as follows:

HIGH SCHOOL.
Miss Nellie Montgomery, principal, Latin and German.

Miss Jessie Chase, English.

Miss Ora J. Woods, Commercial.

Miss Elizabeth Kaufmann, Domestic Science.

GRADE SCHOOLS.
The following are the teachers who will teach the grades in the North Bend schools this year:

Primary, Miss Bernice Hickey.

First Grade, Mrs. Matilda K. Sleep.

Second Grade, Miss Pearl Heath.

Third Grade, Miss Lucy Parker.

Fourth Grade, Miss Bessie Immul.

Fifth Grade, Miss Berdina Hickey.

Sixth Grade, Miss Grace Williams.

Seventh Grade, Miss Josephine Morse.

Eighth Grade, Mrs. Ulysses Woodbury.

HIGH SCHOOL.
The teachers in the high school will be as follows:

J. F. Grubbs, principal and teacher

NORTH BEND SCHOOLS READY

BUILDINGS ARE IN FIRST-CLASS SHAPE FOR OPENING DAY MONDAY — A MOST SUCCESSFUL YEAR IS ANTICIPATED.

The public schools of North Bend will open Monday morning. Both of the school buildings are in first-class shape. The Central school has been repaired and the woodwork retouched and the new high school is complete in every respect. This year Supt. Raab will make his headquarters at the Central school. The principal will be in charge of the high school and on account of the superintendent being located in the Central school there will be no principal there, as Mr. Raab will look after the building.

The teachers have all been assigned to their positions and everything is in readiness to begin work Monday. The people of Bangor addition have petitioned the board of education to have a primary class in the high school building in order to accommodate the children in that neighborhood so that they will not have to make such a long trip to the Central school in bad weather. Arrangements of this kind will be made but all of the primary scholars are requested to gather at the Central school Monday morning and those of the primary classes who live near the high school will be assigned to that building. It is possible to make room for about thirty primary pupils in the high school building.

"Can you swim?" is one of the questions which each pupil will be required to answer on the enrollment card. Superintendent Raab is a great believer in young people knowing how to swim in this part of the country and an effort will be made to teach those of the pupils who do not know how to swim. Instructors in swimming will be secured again this year. A man for the boys and a woman instructor for the girls will be employed and lessons will be given in the school swimming pool.

The members of the board of education who have charge of the school work this year are as follows: L. F. Falkenstein, president; M. M. Strawn and S. S. Jenkins, and C. E. Maybee secretary and treasurer.

Grade Schools.
The following are the teachers who will teach the grades in the North Bend schools this year:

Primary, Miss Bernice Hickey.

First Grade, Mrs. Matilda K. Sleep.

Second Grade, Miss Pearl Heath.

Third Grade, Miss Lucy Parker.

Fourth Grade, Miss Bessie Immul.

Fifth Grade, Miss Berdina Hickey.

Sixth Grade, Miss Grace Williams.

Seventh Grade, Miss Josephine Morse.

Eighth Grade, Mrs. Ulysses Woodbury.

HIGH SCHOOL.
The teachers in the high school will be as follows:

J. F. Grubbs, principal and teacher

NEW HIGH SCHOOL, MARSHFIELD, OREGON.

MARSHFIELD HIGH SCHOOL.

A fine school in which to prepare for college, for teaching, or for business. Special attention given non-resident students; tuition, \$5.00 for three months, payable in advance. For further information regarding studies, rooms and board, write Miss Nellie Montgomery, principal of High School, or Fred A. Tiedgen, superintendent.

MARSHFIELD HIGH SCHOOL.

The High School, which is now entering upon the third year of its four-year course, is far better equipped at present for carrying out successfully the courses which it offers. An added member on the faculty makes it possible to conduct most of the work on the departmental plan. Miss Jessie Chase will be in charge of the English department; Miss Ora J. Woods of the commercial department; Mr. Roy R. Hewitt of the departments of history and mathematics; Mr. A. L. Applewhite, a graduate of Corvallis, of the science department; Miss Nellie A. Montgomery of the Latin and German departments; Miss Elizabeth Kaufmann of the domestic science department. Superintendent F. A. Tiedgen will have classes in history and geometry. This year music will be introduced into the school as a regular study. Miss Frances M. George, a graduate of the Thomas Normal Training School of Detroit, Mich., will have charge of this work and also of drawing. This departmental arrangement will result in far more efficient efforts on the part of both teachers and pupils. The science department, which has been handicapped heretofore because of lack of equipment and insufficient teaching force, will now be in charge of a specialist and furnished with an adequate equipment for physics and chemistry. Classes in physical geography, zoology and botany will also be organized.

To every boy and girl prepared to enter it, the High School has something to offer. To one contemplating a business career the doors of the commercial department stand open. Students entering this department may take bookkeeping or shorthand, or both. Commercial geography and history have been added to the course. All pupils entering this course are strongly advised to take two years of regular high school work before beginning the commercial work.

To those aiming for a university or college training are presented the

NORTH BEND HIGH SCHOOL.

Mr. Roy Hewitt, History and Mathematics.

Mr. A. L. Applewhite, Science.

Mr. F. A. Tiedgen, superintendent, History and Mathematics.

GRADES IN HIGH SCHOOL BUILDING.

Miss Marie Maloney, principal,

(Continued on Page 7.)

of history and mathematics.

Miss Josephine Griffin, language and literature.

J. P. Beaumont, natural science.

Ida B. Mitchell, special music and drawing.

A. G. Raab, superintendent of schools, with headquarters in Central school.
