We all love to be spoken off as loyal ◆ Precipitation none ◆ to family, friends, country and to our | Wind-Southwest; cloudy. ideals. We should also include our home city.

There is no doubt of our sincerity in this and we would feel very much offended were it questioned, but is . . this loyalty always of the right sort; is it intelligent and active or is it sometimes a sentimental and pleasing fancy with which we delude ourselves?

The happiness of the people of a city depends largely on the prosperity of the community as a whole, and this prosperity depends in part upon the amount of money circulating MILLER-To Mr. and Mrs. Marion there. The more money the people send away for things they can buy from their own merchants, the poorer the community will become and, conversely, the more they spend at home, the more the place will thrive.

Do those who patronize distant harm done? If all the good people in Boston, for instance, should ignore the local merchants and for one year Buffalo and New York, there would be "For Sale" signs on the city hall, Young's, the public library and the old North church. The same principle applies to all communities.

Patronage of home merchants is of money which, if spent at home, ing and equipment." would have helped to pay for schools, do not pay any part of our city taxes. But, "Business is Business," some say. Yes, but business is more than that, it is reciprocity, and it should be apparent to everyone that business dealings with those who are working for the same local interests as ourselves will be far more productive of good, than trading with people who are far away, who buy nothing from us and whose only interest in our community is the amount of money they can get out of it.

Do you recall when times have been hard that these mail order houses ever extended you credit to help you over the hard places? Will they? Not in a thousand years-it's money down, or no goods. The local nerchants are the ones to whom we must then turn for assistance, but how can we do so with good grace or reason unless we support them in prosperous times?

They are alert, intelligent and progressive, and, if given the opportunity, will sell better goods at the same, or lower prices than the mail order houses can or will and deliver them at once-no express charges, no long delays, no disappointments.

Let us cease, then, enriching a few people in whom we have no sort of interest, at the cost of lasting injury to our own community. Try supporting our own home business for a

Surely, loyalty, in this instance, means spend your money at home.
