

Weather Wise Man

From this time on, wet, disagreeable days will be frequent; protect your health by wearing good shoes.

In the Nettleton Make, we have several styles selected for the Fall and Winter Weather. They are staunchly built, without being cumbersome. The uppers are soft and smooth, yet resisting water; and the soles are of extra weight, but flexible.

We have a variety of styles—some one of them is sure to please you—
At prices that are exactly right for well-made Shoes.

It is the Purchasing Power of your DOLLARS

This is what counts in your Buying, and this is the reason we invite comparison with the credit stores.

BIG INCREASE IN LUMBER CUT

Comparative Statistics of Lumber, Lath and Shingles Marketed.

WASHINGTON, D. C., Nov. 9.

The lumber cut in the United States during the calendar year 1909 was 44,585 million feet, board measure, as against 33,224 million feet in 1908, and 40,256 million feet in 1907. This was an increase of 34.2 per cent over 1908, and of 10.8 per cent over 1907. The output of lath and shingles during 1909 was 3,712 million and 14,945 million, respectively. The increase in the production of lath in 1909 over 1908 was 24.3 per cent and over 1907 1.3 per cent, while the corresponding increases for shingles were 23.4 per cent and 26.4 per cent.

This information appears in a preliminary comparative report covering 1909, 1908 and 1907, which was transmitted to Census Director Durand by Chief Statistician William M. Stenart, under whose supervision it was prepared by J. E. Wheelchel, expert special agent of the Division of Manufactures. In cooperation with the Forest Service of the Department of Agriculture, the Bureau of the Census annually collects and publishes statistics pertaining to the group of lumber and timber industries.

Large Increase in Yellow Pine.

In the group of coast states, from Virginia to Texas, inclusive, together with Arkansas and Oklahoma, there stands probably not less than nine-tenths of the present supply of yellow pine stumpage. The proportion of the total cut of lumber in the United States contributed by this group, together with Kentucky and Tennessee, has been steadily increasing during recent years. In 1907 their output was 17,834 million feet, or 44.3 per cent of the total; in 1908, 15,056 million feet, or 45.3 per cent of the total; and in 1909, 22,057 million feet, or 49.5 per cent of the total. Yellow pine, including the several species, longleaf, shortleaf, loblolly, Cuban, etc., constituted substantially the same per cent of the total cut of lumber in these states in each of the three years, furnishing 72 per cent in 1909, 72.8 per cent in 1908, and 72.4 per cent in 1907. The large increase in the number of mills reporting from this region in 1909 over 1908, namely, from 12,824 to 23,255, amounted to nearly two-thirds of the total increase in the number of mills reporting for the entire United States between these years.

The proportion of the total lumber cut of the country contributed by

New York and the New England states did not vary materially during the three years, being 9 per cent in 1907, 9.6 per cent in 1908, and 7.5 per cent in 1909.

Although the wood-pulp industry continues to make heavy and increasing draft upon the supply of spruce, this tree still practically shares with white pine the place of first importance among the lumber timbers of this region. In 1909 its contribution to the total lumber cut of this group of states was 28.8 per cent, while that of white pine was 31.1 per cent.

The Output in the Lake States.

The relative importance of the Lake states—Michigan, Minnesota, and Wisconsin—in lumber production continues to decrease steadily, as the supply of white-pine stumpage grows less. These states contributed 13.6 per cent of the total lumber cut of the United States in 1907, 13.2 per cent in 1908, and 12.3 per cent in 1909.

Output in California, Oregon, and Washington.

The Pacific coast states, with an output 28.3 per cent larger in 1909 than in 1908, and 2.2 per cent greater than in 1907, nevertheless contributed a smaller proportion of the total cut of the country in 1909 than in either of the preceding years, the per cent for 1909 being 15.5, for 1908, 16.2, and for 1907, 16.8. Douglas fir was far in the lead as lumber material in these states during the three years, the production from this species constituting 68.1 per cent in 1907, 66.1 per cent in 1908, and 68.5 per cent in 1909. It contributed 79.2 per cent of the total production in Washington in 1909, and 83.2 per cent in Oregon, while redwood form-

ed 45.6 per cent of the total output in California.

Of the total production of lumber in 1909 softwoods supplied 33,875 million feet, or 76 per cent, while hardwoods contributed 10,693 million feet, or 24 per cent. Softwoods contributed 1 per cent less of the total production in 1909 than in 1908 and 1907, in each of which years they formed 77 per cent of the total.

In Oregon, 696 mills reported a cut of 1,899,000,000 feet.

ASSISTS IN OPERATION.

Dr. Thomas J. Fox, a former Marshfield boy and whose parents and other relatives still reside here, the other day assisted in one of the most difficult operations known to surgery. The operation was performed at Oregon City and a dispatch from there to a Portland paper gives the following details:

"One of the most dangerous and difficult operations known to medical science, termed the Caesarian section, was performed here by Dr. Hugh S. Mount and Dr. Thomas J. Fox. The operation was necessitated by eclampsia and the case was an emergency. Mrs. Francis K. Brady, corner of Sixth street and Railroad avenue, was the patient, and prospects are excellent for her recovery. The baby is a girl and is a healthy youngster."

Have your job printing done at The Times office.

REAL ESTATE.

I have some of the best buys on the Bay. Can arrange easy terms. Houses and buildings for rent. **AUGUST FRIZEN.** 68 Central Ave. Marshfield, Ore.

SATISFIED!

The results of the election are very satisfactory to some and equally unsatisfactory to others.

One peculiarity of our drug store is that we make trading here equally satisfactory to every customer.

We consider no transaction complete till our patron is satisfied whether a 5c sale or a \$5.00 one.

Ours is the satisfactory drug store. We appreciate your patronage.

Perry, Montgomery & Co.

We sell on Easo Payments.

FLIES OVER BALTIMORE.

Latham Gets \$5,000 Prize From Newspaper There. (By Associated Press to Coos Bay Times.)

BALTIMORE, Md., Nov. 8.—With thousands of persons gathered on the streets and roof tops of every point of vantage witnessing the spectacle, Hubert Latham, the French aviator, flew over Baltimore yesterday for a prize of \$5,000 offered by The Evening Sun.

Every man straightens up his shoulders a dozen times a day, fearing he is becoming stoop-shouldered.

We're tired of the old politicians fighting each other, and making out that they are so big. How do you feel about it?

Have your calling cards printed at The Times office.

While Figuring

ON THE CHEAP WIRING CAMPAIGN DON'T OVERLOOK THE FACT THAT WE ARE SELLING FIXTURES AT A BIG DISCOUNT. ALSO STANDARD MAKE FLAT IRONS WE HAVE ONLY A FEW LEFT. BETTER PLACE YOUR ORDER.
