Had Collision.—While en route up the Columbia last week, the Breakwater rammed the engineer's tug, Araga, doing about \$300 damage. Capt. While in this city Tuesday A. H. Powers announced the fact that one of the Cunningham logging camps would be discontinued some time during the present month. The reason for this move lies in the fact that the present price of lumber will not justify the logging of the rough timber on the remainder of the lands of the company where this crew was working. One crew will still continue operations on the Cunningham. The other crew will begin operations on land lying west of Beaver Slough, which is owned by the company.

A Bake Shop Test

Is made of every milling that Olympic Flour is made of. One of the best bake shops anywhere is run in connection with the mill that makes Olympic Flour. Every batch of flour that goes through the mill is tested. It has to be up to the highest standard—has to make the best bread possible, else it doesn't go into the Olympic sacks.

That is the reason your bakings of bread, biscuit and pastry are always uniformly good when you use Olympic. Your bakings can't be expected to be the same—always unless the flour is. Therein lies the beauty of using Olympic.
