Dear Sir:
 We beg to advise you that owing to the fact, that the steamer Redondo has been put into regular service again between this city and Marshfield, we will be able to considerably improve your service, as we will be able to ship oftener and can afford to send better films to you, as you will be able to get them back to us sooner than heretofore.
 We feel satisfied that with these new arrangements we will be able to get away from the repeater proposition and to supply you with a far better service than your opposition is getting.
 Very truly yours,

A Pointer on Electric Lighting

“I am pointing at the greatest light since the discovery of the electric incandescent. It is the General Electric Mazda Lamp. It is rapidly displacing the ordinary carbon incandescent because it gives twice as much light for less money. But that isn't all: it gives light of a vastly better quality—a clear white light that is restful to the eyes. In fact, this Mazda Lamp is an invention that has revolutionized electric lighting: that has enabled anyone to now enjoy the many advantages of electric light.”

“Now it will cost you nothing to come in and let me prove to you that what I am saying is literally true. Come now; your visit entails no obligation whatever.”
