North Bend News

Chas. N. Norris of Lakeside, who has been ill has been brought to Mercy hospital for treatment.

The North Bend city council will meet tomorrow night to take up various matters. Nothing will be done about the proposed municipal water system for North Bend and Marshfield until Mayor Simpson returns.

Tuesday morning Prof. F. A. Golden will deliver an address at the North Bend high school. He has chosen John Ruskin as the author to be discussed and it is certain that every one attending will be sure to hear a scholarly paper. It is hoped that the parents will be present and encourage this line of literary work in connection with our high-school.

OREGON PRODUCES LESS GOLD THAN SILVER IN 1910

Over One-Half the State's Output of Both Metals Credit to Baker County.

WASHINGTON, D. C., Feb. 13.—The gold production of Oregon, according to Charles G. Yale, of the United States Geological Survey, has of late been between \$750,000 and \$850,000 annually, and of silver between 40,000 and 70,000 ounces, with a tendency to annual decrease in the output of both metals.

Josephine county holds the record as the most productive of Oregon counties in placer gold; on the other hand, the largest production of deep mines comes from Baker county. In output of gold Baker county still holds the lead, as it does in the yield of silver, and it is producing over 50 per cent of the total output of all metals for the state. There are about 175 productive mines in Oregon. The largest number are placers but the greater proportion of the yield is derived from the deep mines. A larger ratio of decrease in gold yield is shown in the placers than in the quartz mines. Productive mining is being carried on in 12 counties of the state.

The southwestern counties of Oregon, comprising Coos, Curry, Douglas, Jackson, Josephine and Lane obtain most of their gold from placers, although some is derived from deep mines. While the placer production in these counties shows evidence of falling off, the deep mine yield has been augmented, so that the combined yield of this tier of counties shows a general increase. The northwestern counties of the state, including Baker, Grant, Harney, Malheur, Union, Wallowa and Wheeler counties, derive much the greater part of their gold from lode mining, the placer gold yield being of less importance. However, of late a decided decrease in yield of both placer and deep mines in this region has been apparent, amounting to about one-fifth of the total of this tier of counties.

The Director of the Mint estimates a gold production of \$631,173 in Oregon in 1910 against \$829,000 in 1909, and an output of 62,848 fine ounces of silver in 1910 against 69,600 fine ounces in 1909.

Buy's Business.—E. F. Morrissey has about closed a deal for the purchase of M. E. Whitmore's interest in the Coos Bay Paving and Construction company and expects to continue the business alone.

In Los Angeles.—As yet no word has been received as to when C. J. Mills, who was summoned to San Francisco to confer with the Southern Pacific officials, will return to Coos Bay. He is now at Los Angeles on business.

Meet Today.—The Port of Coos Bay commissioners met today, but did not take up any business of importance as nothing can be done until the case of the Bennett Trust closes the case of the ennett Trust company and the Southern Oregon company attacking its validity. Messrs. C. S. Winsor, W. C. Harris and Henry Sengstacken were the only members in attendance.

Concert Success.—The concert given by the Naval Reserve Band at the Masonic Opera House yesterday afternoon was largely attended and greatly enjoyed. The various numbers were roundly applauded and the progress the band has made brought many bouquets for the members. The rendition of the overture "Light Cavalry" and the "Hungarian Fantasy" won especial applause. Next to Director Fenton, Dr. Toye probably came in for the greatest individual approval.

BIRDS HELP FRUIT GROWERS.

Undoubtedly one of the main reasons why this country is so free from fruit pests, is that during the winter months robins and other birds assemble in the orchards in flocks. They may eat some of the fruit that has been left on the trees but the main objects of search are eggs, chrysalides and other forms that insects assume in the winter time. It is to be regretted that the birds do not receive abundant credit for their kindly offices but are frequently killed by boys and others in the name of "sport." If it is found that the insects increase as the flocks of robins diminish the reason may become apparent and the birds receive the protection that they deserve.—Myrtle Point Enterprise.

The Swedish Almanac.—The Swedish name almanac differs from English almanacs in giving, besides the usual information, a Christian name for each sex for every day of the year. The names set forth have to receive the approval of the king. The object aimed at is to secure a greater choice of names for parents and to avoid the endless repetition of a dozen or so names. A similar name almanac is issued under royal authority in one of the German states.—London Graphic.

Sounded Bigger.—
 "How did you get that new clerk? He wouldn't accept an offer from me."
 "Probably I offered him larger inducements."
 "I told him his wages would be \$10 a week."
 "That's it, then, I told him his salary would be \$40 a month."—Cleveland Leader.

Moral Courage.—
 As to moral courage, I have very rarely met with the 2 o'clock in the morning courage. I mean unprepared courage, that which is necessary on an unexpected occasion, and which, in spite of the most unforeseen events, leaves full freedom of judgment and decision.—Napoleon.

Beginning Early.—
 Caller (yawning new baby)—Do you think he is going to resemble his father? Mother—I shouldn't be surprised. He keeps me up nights even now.—Boston Transcript.

Ups and Downs.—
 "Oh, well, everybody has his ups and downs!"
 "That's right. Just at present I'm down pretty low because I'm hard up."
