

**Sweet Temper
and
Warm Bath**

Tired bodies and worn nerves respond enthusiastically to a warm bath.

A kettlefull of water doesn't help much—only irritates. With a modern gas water heater the bath problem is solved.

Touch a match to the pilot lighter and by the time you are ready for the bath, the warm bath is ready for you. Let us show you how gas water heaters work. Oregon Power Company.

Good Roads for Coos County

MAN WHO HAS TRAVELED THEM WRITES ABOUT LOCAL HIGHWAYS AND HOW TO IMPROVE THEM.

Editor Coos Bay Times:

Having recently traveled leisurely over both the Myrtle Point and Coos Bay wagon roads to Roseburg, and being something of a student of roads, and having had some experience in road building in years past, I take this opportunity to express some of my views on roads. In this connection I will say that for roofs, rocks, ruts and gullies the Myrtle Point road for some fifteen or twenty miles is the limit. The Coos Bay wagon road is some better. My opinion is, we should concentrate our efforts on the Coos Bay road until we get one good-all-the-year-road. The burden is too great at this time to try and build three roads as we are trying to do without bonding. I would arrange our system of road building in Oregon, and think we would get a better run for our money if we had a trained county road engineer to oversee our roads.

Let all road work by competitive bids with bonds for faithful performance of contract. Under our present system our county courts are usually honest but they are not usually practical road men and are imposed on more or less by road supervisors and who also are not practical road men, as a rule, while some are "grafters." Many farmers are not good teamsters and many farm teams are not good road teams. The results are inefficient in many cases.

Another thing in my opinion is: In some cases, I think, we are spending large sums for building new grades around hills when at the present state of our finances it would be better to plank the old road over the hills. Gasoline or an extra team would be cheaper than the costly grades and results quicker at this stage of the game.

Yours for

GOOD ROADS.

REHEAR CONTEMPT CASE

Labor Leaders Have to Answer Charge of Court Offense.

(By Associated Press to Coos Bay Times.)

WASHINGTON, D. C., June 27.—The contempt proceedings against the labor leaders recently were passed upon by the United States Supreme Court which set aside the jail sentences heretofore imposed by Justice Wright. In discussing the former proceedings, however, the Supreme Court gave the district court the right to reopen the case in the event any contempt of the court itself or of its orders should be found. Justice Wright appointed three lawyers to inquire into all the circumstances and determine whether or not had been contempt of the court itself. This committee J. J. Darlington, Daniel Davenport and James M. Beck.

ANOTHER TRUST INDICTED.

(By Associated Press to Coos Bay Times.)

NEW YORK, N. Y., June 27.—An indictment formulated under the criminal provision of the Sherman law, drawn by the United States District Attorney Henry A. Wise, was returned today by the federal grand jury against the "Eastern Box Board Club" alleged to be the successor of the "Dissolved" Fibre and Manila Association.

GO TO CHURCH IN BALLOON; AIRMEN "DROP IN" AT SERVICE

TOPSFIELD, Mass., June 28.—The balloon as a means of conveyance to church was utilized by Charles J. Glidden and J. J. Vanvalkenburg, in a journey of twenty miles from Lowell to this town.

The aeronauts made an early morning ascension from Lowell, promising friends to land near a church and attend services. After floating before a west wind for an hour and a half, two church spires were noted below. The balloon was brought down and landed 300 feet from the Methodist Episcopal church of Topsfield.

The aeronauts waited until the hour of services and then joined the congregation. The pastor in his address referred to the fact that two of the congregation had dropped into the service from the skies.

FIGHTER "WORKS OUT"

Rough-House Charlie Burns Establishes Training Quarters.

Rough-House Charlie Burns, who is scheduled to fight Guy Lee at the Rink here next Monday night and who arrived on Coos Bay on the steamer Alliance Tuesday, worked out before an admiring audience of local fight fans at the rink this afternoon. Burns will undergo a stiff course of sprouts with Joe Josephson, his manager and trainer, every day until the day of the fight and the public is invited to visit the rink every afternoon at two o'clock to witness the stunts.

Guy Lee, Burns' opponent, will arrive here on the Redondo tomorrow. The men will weigh in at 6 o'clock next Monday night. They fight at 133 pounds.

After the show try a Turkish bath

Phone 214-J.

It is worse than useless to take any medicines internally for muscular or chronic rheumatism. All that is needed is a free application of Chamberlain's Liniment. For sale by all dealers.

LOGGING CAMPS WILL NOT CLOSE DOWN

ABERDEEN, Wash., June 23.—Indications are that logging camps on Grays Harbor will not close down for the summer, as was suggested by the lumber combination on Puget Sound. Most of the camps will shut down for about ten days to include the Fourth of July, but owing to the disorganization of business and the expenses connected with a shut down, the managers prefer to keep running, especially as better lumber trade is expected this fall. Although there are at present plenty of logs, cutting will continue, and reserves will be held.

One logger said in regard to closing, "Suspension of work simply means that we lose the result of long organization. The men scatter, and when work is resumed it takes a long time to get into shape again. We have tried closing down before, and each time we close we find that we have merely added to our expenses."

MENACE TO HUMAN LIFE SEEN IN USE OF WIRELESS SYSTEM

LONDON, England, June 27.—If the theories of the German scientist, Hensingmuller, are correct, the approaching wireless age will compel people to wear metal insulated suits, protecting them from deadly electric waves. A new form of violent toothache, it is said, already has been caused in those exposed thereto, as well as loss of hair and of some of the senses.

The scientist points out that there is no essential difference between wireless waves and the X rays whose terrible nerve shriveling effects are well-known.

He estimates that only one-third hundredth million of the electrical energy generated for a message are transmitted by stations only a mile apart is actually used. The rest is dispersed in the atmosphere and hits us somewhere.

FALSE EYE BLOWS UP; MAY DIE.

ALLENTOWN, Pa., June 28.—The false eye worn by Building Inspector Frank F. Minner exploded today, as he sat chatting with a friend. Minner fell in a swoon.

His companion was at a loss to know what had happened until blood began to flow from the inspector's eye socket.

Minner was rushed to a hospital. It is feared that particles of glass have penetrated his brain, in which event serious results are looked for. He is still unconscious.

The theory is advanced that celluloid had been substituted for glass in the making of the eye and that the heat of the body caused the explosion.

FOR REAPPORTIONMENT.

Senate Committee Reports For Bill Although Opposed.

(By Associated Press to Coos Bay Times.)

WASHINGTON, D. C., June 28.—The Senate Committee on Census today agreed to report the congressional reapportionment bill without amendment. The bill provides for 433 representatives and was reported notwithstanding the fact that all committee members had expressed themselves as opposed to increased representation.

A TURKISH BATH will do you GOOD. Phone 214-J.
