HOW ABOUT IT?

SAY, you smug Coos Bayite with a kick on your town and country and climate, what do you think of 270 dead from heat in New York in one week, and more dying hourly, with others going mad under the stress?

Old-Time Love Letters.

In an old book, dated 1820, there is, the following very curious love epistle. It affords an admirable play upon words:

"Madame—Most worthy of admiration. After long consideration and much meditation on the great reputation you possess in the nation, I have a strong inclination to become your relation. On your approbation of the declaration, I shall make preparation to remove my situation to a more convenient station, to profess my admiration, and if such obligation is worthy of observation and can obtain commiseration it will be an aggrandizement beyond all calculation of the joy and exultation of yours, SANS DISSIMULATION."

The following is the still more curious answer:

"Sir—I perused your oration with much deliberation at the great infatuation of your imagination to such veneration on so slight a foundation. But after examination and much serious contemplation I supposed your animation was the fruit of recreation or had sprung from ostentation to display your education by an odd enumeration, or rather multiplication, of words of the same termination, though of great variation in each respective signification. Now, without disputation, your laborious application in so tedious an occupation deserves commendation, and thinking imitation a sufficient gratification, I am without hesitation, yours, MARY MODERATION."

THE WISE OLD MAN.

The old man sits in his father's shade, and fills himself with pipe tobacco, and he smokes his pipe as he glances over the thrilling facts of the football score. He has no need and he has no care, and he just leans back in his rocking chair and views the world with a cheerful smile, for his father's fall, and he has his pipe. The plan he followed was still in force. He used to work like a hard-fisted horse; he swung his ax and he piled the spuds, and he knuckled down at the saw-mill's trade wherever he worked; in the field or town, a part of his earnings he saved. He saw the fall of speed, and he had a box to hold a three brass coin, they buried their money as though with feet he took to the bank a big big box. And now he sits in his father's shade and views the world with a wooden spade, and people smile as they look at him; he's fat and easy and full of vim. And where are the fellows who drew their wage and blew it in, in that bygone age? Do they lean back in their rocking chairs, serene and happy and free from cares? Have they their figs and stuff to eat? Oh, ask the copper who walks your bent.
