

The Range That Really Saves Fuel

Probably every one that ever looked at a range was told by the salesman that it was a "fuel saver." That's because they all realize that fuel economy is the most attractive of all features about a range to a thoughtful person.

Most of this "economy talk" is just talk with no reason behind it, but we can show you exactly why the Monarch will cut down your fuel bills.

Ordinary "cast iron and steel ranges" waste fuel, because after a little use the bolts work loose, where the steel is bolted to the iron, and the stove putty dries up and falls out of the seams.

Then it begins to take more fuel to keep a fire on account of the "air leaks" through the once tight joints which open up wider year by year till the range soon consumes twice as much fuel as it did when new.

Come in and let us show you some other mighty attractive Monarch features.

There is the

POLISHED TOP, doing away with stove blacking.

DUPLIX DRAFT, causing perfect baking.

OVEN THERMOMETER, a convenience always appreciated.

COMPLETE ASBESTOS LINING, making a quick heating oven.

And many more, besides a REASONABLE PRICE.

Good, Sound Reasons for MONARCH Economy

Monarch Ranges are built so that they can never have "air leaks"—

For around every opening into the body there is a Malleable Iron frame to which the steel is riveted.

No putty is needed in such joints. They are air tight when new and stay air tight.

If these other ranges were built in this way they might be economical too.

Investigate this matter of rivet construction versus stove bolts and stove putty. It's important to everyone using or buying a range.

SENATORS WILL HELP COOS BAY

Chamberlain and Bourne Write Concerning Coos Bay Jetty Project.

The following letters from Oregon's senators have been received by the Chamber of Commerce in response to the resolutions recently forwarded requesting their aid in securing an appropriation for the jetty project for the Coos Bay bar: Dr. J. T. McCormac, President, Marshfield, Oregon.

My Dear Sir: I am in receipt of your favor of the 8th instant, asking me to use my efforts to secure an appropriation for the beginning and completion of Project No. 2 referred to in the petition which you enclosed me.

In reply to your letter, permit me to say that there will be no appropriation bill introduced or passed at this session of Congress except an urgent deficiency bill to meet the expenses of the session, but it will afford me pleasure,—and I am sure I will have the cooperation of the Oregon delegation,—to do what I can to secure an appropriation at the next session of Congress.

I have the honor to remain, Yours very respectfully,
GEO. E. CHAMBERLAIN.
Dr. J. T. McCormac,
Marshfield Chamber of Commerce,
Coos Bay, Oregon.

Dear Dr. McCormac: I have your letter of July 8th enclosing resolutions adopted by the Marshfield Chamber of Commerce urging an appropriation of funds for the beginning and completion of Project 2, as recommended by the Chief of Engineers, in House Document 958, 60th Congress, 1st session.

I wish to thank you for sending me these resolutions I shall keep the same in mind when this subject comes before the Senate Commerce Committee at the regular session, in December. You may rest assured that I shall do the best I can to promote the best interests of Coos Bay.

With best wishes,
Yours very truly,
JONATHAN BOURNE, Jr.

Would be Teachers in Idaho

SOME LIVELY, INTERESTING, NEW AND RIDICULOUS ANSWERS TO QUESTIONS AT A TEACHER'S EXAMINATION — LACK OF KNOWLEDGE OF SEA COAST SUBJECTS.

An examination of candidates for certificates as school teachers in the state of Idaho, was recently held in Idaho. The answers to some of the questions particularly those applying to the sea would indicate that there is more than a commercial need for the building of the Coos Bay and Boise railway. The land lubbers of that section are certainly in need of enlightenment on ocean topics. But here are the questions and answers as furnished by one of the examiners and readers may judge for themselves:

"What is a dry dock?"
"A dry dock is an old dock gone dry."

"A dock free from the tide."
"A dock that does not overflow."

"A dock where there has been lots of water, but it has dried up and left a rocky and dangerous coast."

"A place where ships can not enter and the cargo must be taken out in small boats."

"A dock that has been raised out of the water by the rising of the shore line."

"A place where naval supplies are kept."

"A place where ships are built and then launched down a chute. A bottle of wine is usually broken over the bows."

Here is one who takes the word "dry" in its latest sense.

"A dry dock is a landing from which no intoxicating liquors can be shipped into or sent out of a country."

Since the question, "What is the Smithsonian Institution?" follows, it is also connected with the sea and you guess again.

"The Smithsonian Institution was established for the purpose of caring for disabled sailors and seamen, and for children who have lost friends at sea."

Another says it is the "home for aged and unable seamen."

Still another, guessing from the name "Smithsonian," says: "The Smithsonian Institution was founded by a man named Smith as a refuge for his descendants."

Of what colossal proportions must be this establishment.

Again: "The Smithsonian Institution was founded by scientific men, a specimen of each being kept there."

And: "The Smithsonian Institution was founded at Tuscogee, Georgia, by Booker A. Washington for the negroes, his people."

"The Smithsonian Institution was founded by Mr. Roosevelt and the government for the purpose of exhib-

A NOTRE DAME LADY'S APPEAL.

To all knowing sufferers of rheumatism, whether muscular or of the joints, sciatica, lumbago, backache, pains in the kidneys or neuralgia, write to her for a home treatment which has repeatedly cured all of these troubles. She feels it her duty to send it to all sufferers FREE. You cure yourself at home as thousands will testify—no change of climate being necessary. This simple discovery banishes uric acid from the blood, loosens the stiffened joints, purifies the blood, and brightens the eyes, giving elasticity and tone to the whole system. If the above interests you, for proof address Mrs. M. Summers, Box R, Notre Dame, Ind.

The cost of repairing the wiring in our building in Marshfield was nine dollars. The owner at once got a reduction of Fifty Dollars per year in the insurance. Think it over.

You Will Find

Solid, comfort and satisfaction in OUR FURNITURE made by the best manufacturers it combines elegance durability and comfort. Our goods being substantially made will retain their fine elegant finish and last a lifetime and always prove a source of satisfaction. Another important fact is that our prices are no higher than for poorer quality and trashy goods. Let us figure with you when you want anything from a kitchen chair to a complete outfit.

C. A. Johnson,
Oldest Furniture Store on Coos Bay

biting his African specimens." "What is a postal savings bank? What are its advantages?" More faking.

"A postal savings bank is for the purpose of saving post cards. One advantage is you don't have them lying around."

Another says: "A postal savings bank is a place where mail goes that is not called for, or has the wrong address."

What are the advantages of a forest reserve? This should be easy, but we are told first that:

"The forest reserve is to preserve the living and dispose of the dead."

Next we are told: "The forest reserve is a place where people who have done much mental work, go in summer."

What is a life saving station? "A life saving station is a station in some open place to accommodate people who may go there."

A little vague, but the next one is sure she knows and says positively: "A life saving station is maintained by the Salvation Army for the saving of souls and sick people."

To the question, "What are some of the reclamation projects of the national government," we have this: "The reclamation projects of the national government are: The White House at Washington, the asylum at Blackfoot, the school for the blind at Niagara Falls; army and navy."

Another gave as her opinion that the reclamation projects are "reciprocity with Canada and the Panama canal."

"A custom house," says one, "is a place where goods and people are opened for inspection by the customs officers."

"What was the cause of the Mexican war?"

"No wonder there is some shying at that question. The idea that the Americans were to blame seemed to obtain. Some wrote at great length telling of the stand taken by Uncle Sam, explaining trade relations, the Monroe doctrine, reciprocity, the tariff and many other subjects, but never by any chance mentioning Mexico."

One candidate said: "The Mexican war was caused by Americans who have died and crossed the border and gone over into Mexican soil."

As a definition for the Vatican we have, "a city in Egypt," "a strip of country along the Red sea," "a desert," "a mountain," "the man who discovered the reformation," "the author of Roman law," "a church in England where are buried the kings and queens," "a school for girls at Poughkeepsie, N. Y.," "the name of a book," "a river," and "a school for Catholics."

"Arbor day is a day set apart to mourn for the blue and the gray."

"The probate court is to probe cases to see if they are worth trying."

"A nation orders a coast survey to see if any other nation is fighting against it."

"To vote at school election one must be either male or female. The persons who may vote are those who are neither polygamist, bigamist, or foreigner."

"It is 23,000,000 miles across the panhandle of Idaho."

"The articles of incorporation are the toilet articles used by the confederate soldiers in the revolutionary war."

"Social efficiency," says one, means to be a good mixer. In short, to be able to rub up against the other fellow gracefully."

Again, "social efficiency enables one to hold an enviable position in society."

"The development of social efficiency is brought about by the use of dumbbells, Indian clubs, outdoor games and athletics in general."

NOTICE TO FRUIT GROWERS AND RANCHERS.

You are earnestly requested to make a special effort to send choice fruits or vegetables to the Chamber of Commerce as we are preparing an exhibit for the Salem State Fair, also for a permanent exhibit at the Chamber of Commerce. We will be pleased to have a bill accompanying the fruit that we may pay for all received.

We ask you to give this your earnest attention. Each specimen will be labeled with the name of the party growing the fruit or vegetables exhibited.
