The Difference in Hair Brushes

It is the easiest thing in the world to buy an ordinary hair brush. They prevail to a much greater extent than the better kind. The ordinary brushes are the easiest to make, and the profits thereon are larger. But when it comes to what is most desirable—wearing quality, perfect workmanship and faultless material, you can't get anything but good brushes at this store. From \$1 to \$4.

The rocks in the channel near the C. F. McCollum summer home will be blown out and the river made more accessible to launches. It is expected that the new camp will be opened in about six weeks when the Cunningham camp will be shut down and the equipment moved over.

Initiate "Freshies".—The Biltmore Forestry students Saturday afternoon enjoyed their annual initiation of the freshmen. The wharf in the rear of the C. A. Smith retail yards was the scene of the frolic. One of the degrees in the initiatory service was tossing the "Freshies" into the Bay. This is the one time in the year and the only semblance of hazing that the professors of the school permit. Despite their soaking, the freshmen got a lot of fun out of it or rather out of the expectancy of being able to do the same thing to next year's freshmen.
