GRABS TUNNEL SITE FROM S. P.

Engineer Hunt Gets Strategical Point Away From Harriman Lines.

EUGENE, Ore., Sept. 18.—The Guard says: "That the Pacific Great Western Railway company known as the Hunt company, is outdistancing the Willamette Pacific, or Southern Pacific company, in securing right-of-way for the road to the coast is evidenced by the large number of deeds the Hunt people are filing for record, as compared with the number filed by the Harriman people. It was learned today that the P. G. W. has secured deeds to the land where the Southern Pacific intended to bore through the coast mountains for its big tunnel and they now control both sides of the mountain there, effectually blocking the other people, and compelling them to seek another place to cross the summit. The Pacific Great Western right-of-way agents worked for a long time in that section of the country before it became generally known and they were successful in securing a large number of tracts over which the Southern Pacific survey passes. "Three deeds for right-of-way filed for record by the Hunt agents today, cover the tunnel site."
