 elans' trust' but because it is for the good of the people.
 "The selfish physician will be glad to see the present condition of affairs continue because it tends to produce disease and thus throws into his hands an increased practice. The altruistic physician believes in prophylaxis rather than in therapeutics. He is willing to sacrifice his own income in his devotion to the public service."
 Vigorously did Dr. Wiley attack as a "thief and a corrupter of good morals" the manufacturer who sells adulterated foods and drugs. "The human animal," he declared, "is entitled to a pure and wholesome diet." "The drug store and the grocery store," he said "should be distinct concerns and not sell each other's wares. The man who converts peanut shells into pepper on the ground that the poor man is not able to buy pure pepper is a thief and a corrupter of public morals.
 "Especially is this principle true" he declared "as regards children and no penalty is too severe for the man who deliberately puts a poisonous dye into candy to sell the stick for a penny and puts two thirds of the penny into his own pocket. Or, when children of a larger growth are able to frequent the ubiquitous soda fountain why should they be permitted to freely purchase injurious alkaloids or fraudulent substitutes for sugar used as a sweetening agent."

POCAHONTAS NOTICE.

All members of the Pocahontas Lodge are requested to meet at the Swedish hall Thursday evening, September 28, at 7:30, on very important business. By order of
 MARGARET METLIN,
 Pocahontas.

JAP SHOPPING BAGS. 75c to \$1.00 at Coos Bay Cash Store.

NOTICE TO FISHERMEN.

We want fresh salmon and are prepared to pay the highest cash price for them. For further particulars see

FRUIT LAWS ARE ENFORCED

Inspector Hall-Lewis After Coquille Ranchers For Violations.

P. M. Hall-Lewis, fruit inspector for Coos county, passed through here today enroute to Bandon and lower Coquille points where a number of arrests will be made if conditions in the fruit business are as have been reported to him. He will take a constable along from Coquille and will get quick action.
 He is also arranging for the enforcement of the state law requiring growers to put their names and post-office address on each box of fruit marketed. This is an indictable offense and a number of ranchers will be bound over to the grand jury by Justice Holden at Coquille for failure to comply with the law.
 Last Friday, Alf Miller, a rancher on Cunningham Creek, appeared before Justice Holden to answer the charge of selling diseased fruit. On the advice of his attorney, Mr. Miller pleaded guilty. Justice Holden fixed his fine at \$25 but owing to this being his first offense, the fine was remitted.

ALONG THE WATERFRONT.

What the Panama Canal means to the commerce of this country can be seen in the announcement of the formation of a \$15,000,000 corporation in Baltimore recently to operate a line of fifteen fast freight and passenger ships from New York to Seattle, with stops at intermediate points. B. N. Baker, former head of a big steamship company and one of the staunchest advocates of an American merchant marine is at the head of the movement. Work is to begin on the construction of the fleet immediately, to be ready for operations when the canal opens in 1914.

WOMEN OF WOODCRAFT.

All members of the Women of Woodcraft are specially invited and requested to be present at a Model Meeting of Coos Bay Circle No. 164 at L. O. O. F. Lodge rooms on Sept. 28th, 1911, at 8 P. M. Visitors from the Grand Circle will be present.

DREDGE WILL START SOON

First Work Will Likely Be Opposite Cold Storage Next Week.

Permission from Major Morrow, in charge of the United States government's work on the rivers and harbors of Oregon, has been granted for the dredge Oregon to widen the channel at the mouth of Coos River, opposite the Cold Storage. The permission was received today by Engineer Leefe in charge of the work here, and it is expected that the Oregon will begin work on the project early next week, possibly Monday.

The permission was granted by Major Morrow in accordance with a request from Mr. Leefe who took it up with him following statements from navigators that the current and sharp turn in the channel there made navigation difficult.

It is likely that the Oregon will not go to Pony Inlet to work this fall as a result of the discovery that the tide and current are widening and deepening the channel through the old shoal, taken September 21, by Donald M. Charleston. These soundings show that the channel is considerably wider and deeper than when the Oregon left it, proving Mr. Leefe's theory that the channel would scour out. A little deposit remains but it is believed that this will also wash away, leaving the channel in fine shape there. The matter has been laid before Major Morrow and orders from him will be received shortly.

The overhauling of the dredge has practically been completed and in consequence of the likelihood of the Pony Inlet work not being necessary, the dredge will be able to start on the Coos River project soon.

This project starts about 400 feet north of the Standard Oil warehouse and tapers out so that the channel at the mouth of Coos River, near the turn, will be about 400 feet wide. It will again taper southward down to the old project.

Approximately 100,000 feet of dredgings are to be moved. Today A. H. Powers and others are endeavoring to hasten the completion of the bulkhead in the north part of town so that these dredgings can be utilized in filling that low section and especially filling the street to grade. Engineer Leefe has promised to cooperate so far as possible but cannot wait on the bulkheading. If the bulkheading is not complete, he states the dredge will simply have to pump the dredgings over onto the mudflat on the east side of the channel, although he regrets the possibility of such a thing. However, he feels that the property owners have had ample notice to avail themselves of the opportunity to utilize the dredgings.

The Market avenue and intersecting street fills by the dredge will have to go over until next spring. There is about 30,000 yards of material to be taken out on the eastside of the channel near the Ferry Transit's course and this can be utilized for the latter project.

Mr. Leefe left today for San Francisco on a short vacation trip and Donald M. Charleston will be in charge of the work during his absence.

THE PEACEMAKER.

Two neighbors had an ancient feud. They banded language vain and rude, and threw dead cats across the fence, and seemed to sidestep common sense. One day they passed from words to blows; one neighbor smote the other's nose, and chunks of rock began to whirl, and chunks of air was full of fur. Then I stepped in with kindly smile and bade them cease this work of guile. "Let dogs delight, my friends," I said, "to paw around and raise Old-Ned. Let crocodiles and tigers fight, let wasps and anacondas bite, but it is wrong for you galoots to seek the level of the brutes." Then both the scrappers turned on me and soaked me where my vitals be. They blacked my eyes and maimed my shin, and hit my nose and knocked it in; they kicked me roundly in the neck, and when they saw I was a wreck, they went off arm in arm to buy some lemonade, or milk or rye. I will stand up for balmy peace; I know that it's as slick as grease. The White Winged Dove, on land or sea, it's all that it's cracked up to be. But after this when neighbors fight I'll let them fuss around all night; and if rebukes by me are thrown, I'll send them in by telephone.

RAILWAY NEWS OF COOS BAY

ENGINEER SUMNER AND PARTY RETURNS TO TEN MILE—FIGURES ON RIGHT OF WAY OF SIMPSON LOGGING ROAD.

There has been a dearth of railroad news on the Bay today.

Engineer Sumner and his party of engineers returned to Ten Mile from North Bend yesterday and what their future movements will be is not known. No further line on who is behind the Sumner survey has been obtained. He is paying all bills as they go. It was also reported that they were buying right of way in or near North Bend but this could not be confirmed. One report had it that about \$250,000 had already been expended by the people behind the Sumner survey.

Some North Bend citizens were expressing indignation today as a result of a report that a party of Marshfield men went to North Bend and tried to get Mr. Sumner to move his headquarters to Marshfield. But little credence is given this report, someone evidently having started it to have some fun with some Marshfield men who were in North Bend the other day or to try and stir up things in North Bend. They surely got a raise in North Bend, according to reports from there this afternoon.

A few days ago some of Mr. Sumner's party were making inquiries about buying the right of way and work that was done on the logging road from North Inlet to Ten Mile by the Simpson Lumber company some time ago. However, they have not purchased it yet.

No word has been received from Vice-president O'Brien and party who were to have reached Eugene last night.

No news has been given out concerning the Coos Bay and Boise project.

Engineer Sandberg is working on the survey on this end for the Terminal Railway but there will be no developments in it until the franchise is secured in North Bend, probably.

Engineer Aston of the Coos Bay and Eastern Electric is back in Marshfield and reports that his crews are making good progress on that survey.

LEARNING CIVIC DUTY.

New York School Children Conduct a Miniature Government.

That the children in public school No. 147, New York, will know something about the intricacies of municipal government when they grow up appears to be a certainty to their instructors, for between their studies the pupils conduct a miniature city government. In this mimic government suffrage has already arrived, the police department being run by the girls. Party politics is barred.

The youngsters have a complete administration, boys and girls serving as heads of departments, commissioners and city employees. It is called the "School City." The pupils study, talk and write on such important subjects as water famine, clean streets, preservation of trees, parks, keeping the city beautiful, sanitation and kindred things that teach them the importance of co-operating with the authorities to maintain a clean and wholesome city in reality.

COAST LEAGUE BALL SCORES

By Associated Press to the Coos Bay Times.

PORTLAND, Ore., Sept. 27.—Portland and Vernon both won yesterday, leaving the Coast League race about as before. The scores yesterday:

At Portland—	R	H
Portland	2	5
San Francisco	1	3
At Los Angeles—	R	H
Los Angeles	4	11
Vernon	7	12
At San Francisco—	R	H
Sacramento	5	16
Oakland	3	8

HOW TO CARE FOR TIRES.

Method of Removing Rust, Which is an Enemy to Rubber.

Rust is an enemy of rubber. It will pay the motorist to inspect occasionally the condition of the rims on the wheels of his car, especially if the outer surfaces of the envelopes near the beads look rusty. This discoloration is rust caused by rusted rims. This rust if not arrested will gradually eat through the rubber, attacking the canvas of the envelope. In time the edges of the rusted rims will become more and more uneven, tearing and eventually destroying the beads. Furthermore, rust works in between the beads and the rims, leaving space for water, which also damages the rubber.

To remove rust from a rim, the tire should be taken off and the rusty parts rubbed clean with coarse emery paper. Then smooth the surface with finer emery paper and rejoin the rim, applying one coat to the outside and two to the inside, making sure first that the surface is smooth and free from rust. Roughness may be quickly detected by running the hand along the edge of the rim. When the edge of the rim is too uneven for the use of emery paper, first use a file, after which emery paper may be used for finishing.

How to Make Summer Desserts.

Any simple summer dessert, such as cornstarch or Bavarian cream, fruit sponges or gelatin pudding, can be served in most attractive shape if it is well molded. Dip the mold in cold water, drain it, but do not dry. Fit a ring of candied cherries or of strawberries or any desired fruit round the base of the mold.

Then pour over carefully a small quantity of the dessert mixture. A second, third and fourth row of the fruit may be added, each being carefully covered or filled over with a layer of the mixture.

After the mold has "set" and been chilled it can be garnished with cream. A great variety of dessert mixtures can be treated in this way.

How to Freeze Ice Cream.

Ice cream may be frozen in five minutes, and at only an expense of 2 or 3 cents, if the mixture to be frozen be placed in a tin bucket or other vessel and this set in a pail containing weak solution of sulphuric acid and water. Into this stir a handful of common salt, and the cold is so intense that a bottle of wine immersed in the mixture will be frozen in a few minutes. This is an easy way of freezing small quantities of sherbert for luncheon in hot weather.

How to Keep Cabbage Fresh.

Frequently one-half a cabbage is required at a time. To keep the remainder fresh wrap it in some of the loose leaves and afterward in damp paper. Put it in a cool place, and it will keep fresh and crisp for a day or two. Half a cut cucumber may be kept fresh by standing it in a tumbler of water.

How to Keep Furnace From Rusting.

Flaked lime, placed loosely on a board inside a furnace during the summer, will take up moisture and thus prevent the metal from rusting.

GOOD CHILDREN, GOOD CITIZENS

What Some Are Doing For the Younger Generation.

EAST AND WEST INTERESTED.

Teaching Children Agricultural Methods and Healthful Exercises at School Only Few of Many Examples to Benefit Youngsters.

Many methods have been devised throughout the country to interest the growing generation in their school studies, in order that they may in the future become useful citizens. The use of the rod is no longer tolerated in some communities, so to accomplish something without the "spare the rod and spoil the child" method progressive teachers have gone out of their paths to insure success with their pupils.

A fine example is that being set by Miss Mary P. Markeson of Napoleon, O., the only woman in Ohio who teaches farming. She is a graduate of the Ohio State university and a member of the Ohio Teachers' association.

Photo by American Press Association.

THE FRESH AIR CLASS OF PHILADELPHIA, which recently met at Cedar Point, O., to absorb useful information concerning the training of youth.

"I teach children how to plant and cultivate flowers and vegetables. Learning agriculture from a scientific viewpoint is an ideal career for all boys and girls," says Miss Markeson. "The children get so interested that the other teachers complain the pupils don't care for their other studies. Napoleon has been practically converted into one great flower garden, my pupils being so eager to learn that many of the experiments performed at school were put into useful effect at home."

Another example, quite different from the one set by Miss Markeson, is that being conducted by Miss Grace E. Phelps of Philadelphia. It is the open air treatment for school children.

On a roof of a public building on the outskirts of the city, suitably arranged for the purpose and covered with awnings to protect the youngsters

Photo by American Press Association.

TAKING A "SUN BATH." from the sun, a class of boys and girls meet regularly every day for the studies and exercises given by Miss Phelps.

The children are taught gymnastics and how to take care of their bodies. At a certain period in the day the pupils are told to lie down on reclining chairs made expressly for that purpose and take a "sun bath."

In speaking of her work Miss Phelps said that not only are the children kept off the streets during the hot weather, but the exercises and fresh air treatment are lowering many of the doctors' bills.

They're Here

Just arrived from the east the swellest line of Clothing ever shown in Marshfield.—We especially want the young men to come in and look at them, for they have CLASS, and the price, \$20.00 to \$25.00, WELL, we just ask you to judge.

Our wet-weather goods are here too.—Swell English Slip-Ons, and Light Rubber Tourists Coats for street wear, Slickers and Rubber Boots for work; so, get ready NOW for that rain.

THE TOGGERY
