COOS BAY OYSTERS GOOD.

Fish Warden Wants Tidlands Set Aside For Culture.

The Oregonian says: "To find if tidlands at Coos Bay are adaptable for the propagation of Eastern oysters Fish Warden Clanton is investigating, and from results so far obtained it is said that section affords better opportunities than Willapa Harbor or Yaquina Bay, where the industry thrives. Two years ago J. A. O'Kelly transplanted young oysters from Long Island Sound to the Coos Bay tidlands and followed the usual methods in cultivating them. Now he has a larger product and one equally as succulent as any transplanted oysters on the Pacific coast. Deputy Warden Gor returned from Coos Bay with samples of oysters, which were inspected and commented upon favorably by the experts of the Fish Warden's office. It will be necessary for the legislature to declare the Coos Bay tidlands suitable for oyster culture before tidland beds can be set aside. Such a step will be recommended by Mr. Clanton in his report to the next legislature."
