

# HARBOR WORK IS OUTLINED

## Army Engineers Make Report on Projects They Have Approved For Next Year.

(By Associated Press to Coos Bay Times.)

WASHINGTON, D. C., Nov. 24.—Estimates for continuing the work of river and harbor improvement throughout the country, made public at the War Department today and covering the fiscal year ending June 30, 1913, show a strict adherence to the new administration policy of asking Congress to appropriate only for those improvements which have received the approval of the army corps of engineers after the most thorough investigation. No new projects of any great importance are provided for in the estimates, and unless Congress takes the bit in its teeth and disregards the recommendations of General W. H. Bixbee, chief of engineers, the "pork barrel" method of river and harbor work will have been eliminated for a second year.

The appropriations asked for an aggregate of \$29,625,698 as against \$30,095,698 for the current year. The estimates will be sent to Congress by the Secretary of the Treasury and President Taft, in his message will urge that they be strictly adhered to. They are divided as follows:

Under continuing contracts \$12,114,988.

Rivers and harbors (general, including Mississippi River commission and examinations, surveys and contingencies) \$17,345,450.

Under California debris commission (expenses) \$15,000.

Prevention of deposits in New York harbor \$153,260.

These estimates it is explained, are intended to cover all the minimum requirements for the prosecution and maintenance of the various improvements. They were made up from estimates prepared on the same basis by the various district engineers, this being done to keep within the limited total estimates deemed advisable for the fiscal year of 1913, and on the supposition that river and harbor work will be provided for hereafter by annual appropriation. The estimates are to be divided between the river and harbor and sundry civil bills and are to be applied to 242 works.

In connection with the estimates, General Bixbee, chief of engineers, said in part:

"Liberal appropriations are considered proper and desirable for snagging and other work necessary to make natural channels available wherever water-borne commerce exists or is reasonably prospective. It is believed that expenditures for such improvements are almost always useful and advantageous to the general public, especially since the introduction and rapid development of small gasoline motorboats for combined freight and passenger transportation. In many cases, it is apparent that the failure to use a waterway is due not so much to lack of channel depth as to the presence of snags and other obstructions which can be removed at comparatively small cost, thus making the natural channel depths fully available throughout the year. When the boat commerce develops or its requirements become greater, the existing clear channel will be in its best condition for further and more expensive improvements.

"Improvements adopted by Congress, and not provided for in the estimates have been omitted either on account of insufficiency of funds now available, on account of lack of urgency or of relative importance, on account of defective projects which were adopted many years ago, and are in need of re-examination with a view to revision or abandonment or in cases in which recommendations for appropriations for new projects have recently been submitted to Congress in special reports.

"Under existing law, re-examinations of existing projects are made by the board of engineers for rivers and harbors in compliance with resolutions by either the committee on commerce of the Senate or the committee on rivers and harbors of the House of Representatives, but these re-examinations are subject to the limitation that no enlargement of the scope of the project can be considered, so that desirable extensions of projects cannot be recommended. It is believed that a similar provision of law authorizing the chief of engineers to cause a re-examination of projects, at least those not heretofore passed upon by the board of engineers for rivers and harbors, would be in the public interest. Projects reported in the rivers and harbors act of March 3, 1899 as unworthy of further improvement by the United States or considered by the chief of engineers as in need of revision, could in this way be fully

investigated, local interests could be heard, and formal report thereon made for the consideration of Congress. It would seem advisable in connection with any such re-examination to grant authority to consider and report upon any modification in the nature of enlargement in scope of projects believed to be desirable, when such modifications are recommended by district officers or otherwise brought to the attention of the Department.

"If desired by congress for its consideration in providing for new works, reports could be submitted by the board of engineers for rivers and harbors and the chief of engineers upon the relative importance of the various improvements recommended as worthy of being undertaken by the United States, the order in which they work should be taken up and the rapidity with which they should be completed, upon methods of standardization by which the waterways of the country could be improved uniformly in proportion to their capacities and to the existing or probable demands of general commerce, or even report upon a systematic scheme of such improvement embracing all waterways, whether heretofore examined and reported upon or not."

The estimates include the following:

California, Los Angeles harbor, deepening inner harbor to 30 feet, \$25,000; San Pablo bay, \$175,000; San Joaquin river, including Stockton and Mormon channels, \$40,000; Petaluma Creek and Nap, a river, \$9,000; Humboldt harbor and bay, \$470,000; Sacramento and Feather rivers, \$40,000.

Oregon—Coos river, \$3,000; Tillamook bay and bar \$5,000; Snake rivers, \$5,500; Willapa river and tributaries above Cello falls to Snake river, \$30,000; between the Dalles rapids and Celilo falls, \$600,000; Willamette river above Portland, and Yamhill river, \$20,000; Columbia and lower Willamette rivers, below Portland, \$475,000; mouth of Columbia river, \$1,000,000; Clatskanie river \$1,000; gauging waters of Columbia river, \$1,000.

Washington—Cowlitz and Lewis rivers, \$5,500; Willapa river and harbor, \$75,000; Grays Harbor and bar entrance, \$500,000; Puget Sound and its tributary waters, \$25,000; waterway connecting Puget Sound and lakes Union and Washington, \$400,000; Snohomish river, \$75,000; Skagit river, \$15,000; Bellingham harbor, \$52,250; Columbia river between Bridgeport and Kettle Falls, \$25,000.

Hawaii—Hilo harbor, \$250,000; Kahului harbor, \$75,000.

### WILL STAY IN ALASKA.

Bishop Rowe Declines Transfer to South Dakota.

(By Associated Press to Coos Bay Times.)

SEATTLE, Wash., Nov. 24.—Right Rev. Peter T. Rowe, Episcopal bishop of the missionary district of Alaska, has declined the appointment offered him of Bishop of the Missionary District of South Dakota. ### MEN

There could be no better medicine than Chamberlain's Cough Remedy. My children were all sick with whooping cough. One of them was in bed, had a high fever and was coughing up blood. Our doctor gave them Chamberlain's Cough Remedy and the first dose eased them, and three bottles cured them," says Mrs. R. A. Donaldson, of Lexington, Miss. For sale by all dealers.

# Built Expressly To Heat Water

The modern GAS WATER HEATER providing plenty of hot water for bath, laundry and kitchen, is successful because it is MADE SOLELY FOR WATER HEATING PURPOSES.

The arrangement of coils is designed to utilize every possible heat unit of the gas flame.

QUICKNESS is one of the heater's big virtues.

There are various styles of gas water heaters. Let us show you how they work. OREGON POWER COMPANY. Phone 178.
