## DAYTON BICYCLES

Girls, Show This to Your Parents.

### FATHER:

Buy a Bicycle for your daughter and you won't have to help pay for Dr. Medico's automobile.

Is it not a fact that many children have to race home at noon, bolt a sandwich and hurry back to school in order to be at their desks when the school bell rings?

Does their lunch agree with them? Hardly.

With a Bicycle, on the contrary, your daughter can wheel leisurely home, eat and enjoy a sufficient luncheon and return to the school house with plenty of time to spare.

No hurry, no bolting of food and no tired nervous feeling with which to begin the afternoon's studies.

There are also hygienic reasons which will occur to mothers without further comment.

In at least two large schools in California, the directors have caused staples to be driven in the walls of the basement to which Bicycles can be locked during school hours. All that is required is an ordinary staple driven into the wall at a height corresponding to the top of a bicycle frame. A cheap lock with chain attached locks the wheel to this staple. The bicycle cannot fall over or be taken away.

Does your daughter eat a cold lunch while huddled in a corner? And is she nervous and irritable after school hours? If she is not, those conditions have a tendency to make her so.

After three hours at a desk, what could be more refreshing than a ten-minute bicycle ride?

Then a dainty lunch, leisurely eaten.

Who ever heard of a dainty lunch in a basket, or wrapped in a paper?
