Official Paper of Coos County

An Independent Republican newspaper published every evening except Sunday, and Weekly by The Coos Bay Times Publishing Co.

C. A. SMITH AN ECONOMIC GENIUS

C. A. SMITH is rapidly assuming the enviable position of fairy godfather to Coos Bay. His latest contribution of a new paper pulp mill, as announced in The Times yesterday, marks another forward movement in the industrial development of this section.

Important as this new enterprise is in a commercial way, however, it is of still greater import in its economic phase. It is further evidence of the undoubted economic genius possessed by C. A. Smith and which he is applying in such a practical manner in the development of the resources of Coos Bay.

Back of the bare and bald statement of facts involved in the new narrative of the commencement of a new commercial and manufacturing enterprise is the more interesting story of Mr. Smith's long thought out plan and its fulfillment. Ever since the erection of the big sawmill Mr. Smith has been applying himself to the problem of utilizing the waste. He has carried the paper mill thought with him for several years. More than two years ago The Times printed a story of the chemical experiments with Coos Bay woods being made by Dr. Frankforter of the University of Minnesota, of which Mr. Smith is a regent. Dr. Frankforter visited Coos Bay and made a number of tests of which he was most enthusiastic. The Doctor is an educator and a scientist, and it still remained for Mr. Smith to find the experts in manufacture who could make practical application of the new processes by which the by-products of alcohol, turpentine and resin could be secured. He has continued this search for two years and yesterday's authorized announcement marked its successful culmination.

It has been said that "any man who makes two blades of grass grow where only one grew before, is a benefactor to the race," and Theodore Roosevelt has written that "every step of the progress of mankind is marked by the discovery and use of natural resources previously unused." This then is a splendid contribution that C. A. Smith is making to civilization in utilizing a waste product and from it adding largely to the store of the world's wealth and a new industry for the employment of labor.

The new Coos Bay mill will be the only one of its kind in the world operated entirely from waste and producing 30 to 40 tons of paper pulp daily and then as by-products 15,000 gallons of alcohol, 440 tons of turpentine and 300 tons of resin annually. All these important articles in the world of commerce are now going to waste and would so continue but for the far-seeing genius of C. A. Smith, who in his almost marvelous manner is having solved the problems of science as well as of business organization.

The new mill will be as important in its way as the great lumber factory that preceded it. It will mark a new epoch in the manufacture of paper in America and in this way will be of additional value not only in advertising the resources of Coos Bay but in establishing this place as the home of a man who by his accomplishments in industry and commerce is achieving a name and fame for himself as the economic genius of his century. Coos Bay has just cause to be proud of being the home of Mr. C. A. Smith.

A GREAT INDUSTRY

RECENTLY The Times printed a news item to the effect that F. S. Dow had made the largest single shipment of eggs ever made from Coos County.

It consisted of one hundred and fifty cases and was consigned to British Columbia.

This shipment brought the poultrymen of Coos County \$500. It is important as marking the beginning of what is destined to be the develop-

ment of one of the important resources of this section.

There is no reason why every steamer leaving this port should not carry a consignment of eggs supplemented by shipments of poultry. Conditions are as favorable here for raising poultry as anywhere in the United States.

Petaluma, Calif., secures a gross revenue of ten million dollars a year from its poultry industry. This sum of money would be the equivalent in wages of several mills as large as the C. A. Smith industry.

If only a small portion of the idle land in Coos County was utilized for poultry farms, in a short time the revenue from this source alone would make this a rich and prosperous community.

Owners of idle tracts of land should make it a business to offer special inducements to the poultrymen, sell on such easy terms that any one can purchase, or lease for small amounts, for poultry enriches the soil as well as produces revenue.

Turkeys should receive special attention, for local conditions are peculiarly adapted to their production, and much money can be secured by raising them in small numbers as a side issue to the orchard ranch.

On an acre of land, with water, an industrious worker can raise in this time not only all the produce his family consumes, but poultry enough to realize a good income.

WITH THE TOAST AND TEA

GOOD EVENING

"Every one has his besetting fault—that is no disgrace to him, but it is a disgrace if he does not find it out, and overcome it."—Dr. Livingstone.

THE SPRING ZEPHYR

I am the gentle breeze That blows in spring— The thing Concerning which the poets sing Their melodies, I flip hats through the street; I rout The microbes out And send them forth to meet The man who falls to close His mouth or use his nose For breathing purposes. I make The hobbie skirt Look like a pair of tights. I'm wild and free; I break Through windows, and I flirt With destiny. I am the gentle breeze; I scatter dust Upon the wicked and the just; When buds begin to bulge I rip off signs and uproot trees, I cause old people's bones to ache; I make The rich depart for warmer climes, And carelessly betimes I cause the poets to indulge In rhapsodies.

—S. E. KISER.

There is a wide difference between a driving rain and a driving rein.

We do not always meet misfortune; quite as often it overtakes us.

Food for thought is more satisfying and fattening than is thought for food.

There are some Coos Bay husbands who are such poor providers that they can't furnish even an excuse.

Any little Elk that's a nice little Elk, Is the right little Elk for me; He don't have to look like an Eagle or a Moose.

If a good little Elk he should be

The girls all cry "Why, Hello, Bill!" When they sit upon his knee; Any little Elk that's a nice little Elk, Is the right little Elk for me.

—E. D. McAT-UR.

Few of us like the folks who find us out.

It is more difficult to shoe a horse than it is to shoe a hen.

There once was an amorous Mr., Who on meeting a girl always kr.; But one night, at the gate, He found when too late, He'd been kissing the chauffeur's black sr.

He felt that it would have been br. To have swooned the first time he mr.; But the brunette liked the taste As he circled her waist, And she made it quite easy to gr.

Wonder if some Coos Bay girls never smile because they are afraid to light up their faces through fear of setting off the powder?

HOW'S THIS

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CRENEY & CO., Toledo, O. We, the undersigned, have known F. J. Creney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm.

WALDRON, KINSMAN & MARVIN, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all druggists. Tak. Hall's Family Pills for constipation.

RUMORED SALE OF BIG TRACT

It was reported here today that F. A. Warner, son-in-law of C. A. Smith, had purchased an eighty-acre tract near the Blanco townsite from Claude Nasburg and others for \$40,000. The tract is said to be near a tract purchased last summer by Geo. F. Murch and J. V. Smeaton. The report could not be confirmed today.

There is some enterprise in the eastern dealer who transports and delivers fish by aeroplane. But some of his customers consider it scaly business which makes fish come high, although they look for a drop soon.

It was the busy hour of 4 When from a city hardware store Emerged a gentleman who bore 1 hoe 1 spade 1 large rake.

From there our hero promptly went Into a seed establishment. And for these things his money spent 1 peck of bulbs 1 lot of assorted shrubs 1 quart of vegetable seeds.

He has a garden under way And if he's fairly lucky, say, He'll have about the last of May 1 tomato vine, 1 egg plant, 1 radish.

A Missouri woman has been awarded \$2 for the loss of her husband's affections. That's almost as much as the affection of a political friend is worth these days.

POULTRY-KEEPING PROFITABLE

Prof. Dryden Advises Farmers to Increase Flocks and Get More Eggs. CORVALLIS, Ore., April 20.—"There has been an enormous increase in the production of eggs and poultry in the state in the past two years, but in spite of this the demand has far exceeded the supply, and prices are still as high as ever," said Prof. James Dryden, of the Oregon Agricultural College, in discussing the object of the present tour of the poultry demonstration car sent out over the Southern Pacific lines by the college.

"If the farmers of Oregon would keep, on an average, 100 hens instead of about 50, it would shut out the imports and add \$4,000,000 or \$5,000,000 a year to the wealth of the state.

"The purpose of the demonstration car is to stimulate a greater production of poultry and eggs. The quickest and best way is to increase the flocks of the farmers rather than to have poultry-keepers start large egg farms. The demand cannot be met by the establishment of large, exclusively poultry farms. If the general farmer goes out of the egg producing business there will soon be an egg famine—possibly a serious financial panic.

"Though there are opportunities for profit along special lines in poultry-keeping, the market for specialties is limited, and it would be folly to advise everyone to go into special lines. I am free to confess that we have kept more people out of the poultry business than have gone into it as an exclusive business. I have received great numbers of letters during the past year from all parts of the state as well as from other states, in which the writers stated that they were going into the poultry business on a large scale, and a large majority of them said they knew nothing of the business. Our plain duty was to advise caution. If every one of them had gone into the business as they intended and invested their all in it, it is safe to say that there would have been thousands of dollars lost in every county of the state, and the poultry business would have received a black eye.

"Poultry-keeping is not a difficult business unless we make it so. If conducted along sane, common-sense lines, there is profit in it. The two points on which special emphasis is laid in the demonstration car are feeding for eggs and housing. Egg ratings are on display, feeding charts show results of experiments, breeding charts show results of breeding for eggs, different grades and qualities of eggs are exhibited, marketing possibilities are demonstrated, and the equipment for successful hatching and brooding of chicks is displayed. The walls of the car are covered with signs and charts containing lessons in practical poultry-keeping. A 'knock-down' colony house is taken along and set up outside the car at each stop.

"While chickens may be made to do well in different houses, it may be said in favor of the colony system and free range that there is no noted poultry district in the United States where poultry-keeping has been permanently successful, where the colony house system was not followed. The colony house, moreover, was the house used at the Oregon Experiment Station last year for the hens that made the highest egg records ever made in the United States so far as official or authentic record is concerned. The demonstrators on the car explain how those hens were housed and cared for, and answer any questions as to their feeding and treatment."

SNAP Three nice high dry lots in Bank addition to North Bend. All clear and level. Best lots in the addition; can be had now for \$600. E. S. GEAR, room 22, First National Bank.

Attend Marshfield baseball club's benefit dance at Eagles' Hall Saturday night.

Why You Should Ride an IVER JOHNSON BICYCLE It is just as good as a bicycle can be made. It is the standard of the world. It is the most scientifically designed. It has taken the lead for 28 years. It will run for years without a particle of wear. It rides easier than any other bicycle on the market. You pay for nothing except essential bicycle value. You take no risk—we absolutely guarantee every wheel sold. Pioneer Hardware Co. 330 FRONT ST. Agents MARSHFIELD, OREGON

More New Ones New Suits Every Week Ready-to-wear Suits for men From \$8.50 \$25.00 We are still receiving the very latest in We not only have our personal guarantee, but we look after them as long as they last—It's to our interest as well as yours. FIXUP Marshfield—North Bend.

Electric Servants Expect No Days Out Electric washing machines and vacuum cleaners are ready to perform their work quickly and well all the time. In many small households there is too much work for the housewife—a large part of it can be performed better electrically and leave much time free for more important things and recreation. Any servant problem is easily solved in the electric home. If your home is not wired, a telephone call to 178 will bring an expert to explain our proposition. OREGON POWER CO. Telephone 178
