ARSENATE OF LEAD, THE MOST EFFECTIVE SPRAY.

of lead was the most effective in combating this pest and that four sprayings were as good as a dozen.

this valley for quite a number of clad laws or rules laid down for the years and is considered the only effective remedy for the codling moth. remains in its formulative stage. The agricultural department recom- while the relation of the child to the mends four applications: the first state and the parent to the child re-just after the blossom forms; the mains in uncertainty, and while the second three weeks later; the third capacity of the child for present and at some time from July 15 to August future mental work remains an un-10; and the fourth about a month known quantity. later. It is thought that the first application is most important but stacles in the way of scientific edu-that the three others are also necessary. It is recommended that each mountable spraying be done in the most thorough manner so as to make the poison effective in destroying the larvae.

sive crop of apples. One of the most important things in this connection is the finding of a satisfactory mar-ket, for it is useless to raise apples and get nothing for them.

This is what I call the Amer- + ican idea of freedom-a govern- + ment of all the people, by all . people; of course, a government . of the principles of eternal justice-the unchanging law of + God .- Theodore Parker. **********

NELL'S LETTER Cattle browsin' kind o' quiet, Coyot' on the hill. Nothin' else is hardly stirrin'; Seems most awful still.

Moon and stars is brightly shinin'. Sky is blue and gold, Dipper's turned like it's apourin' Joy for earth to hold.

Cayuse is uncommon friendly, Needs no watching now. All the world is full of music, Comes, I don't know how

Never had a kinder feelin' Never felt so well: Guess its 'cause I got a letter From my sweetheart, Nell.

Said her promise she remembered Sent me all her love, Said that she would walt my comin' True as stars above.

Startin' back tomorrow evenin', Going back to stay. For I know my gal is waitin', For our weddin' day.

-BOB STANLEY.

Editor Times: In The Times Saturday there is an Associated Press dispatch telling of a grilling given the high school THE Washington Agricultural ex- of the country by the National Edu-

periment station has been mak- said on the ever old, but ever new ing a test for several years with subject of education in general, and various remedies for the destruction of vocational education in particu-of the codling moth. In previous ex-periments it was shown that arsenate said; and this will doubtless be true for many decades in the future.

No very correct or scientific con-clusions in regard to this important Arsenate of lead has been used in matter can be arrived at, and iron-

The best thing that can be done at present is to take things just the we find them, and empirically work toward a solution of the puzzling If all fruit growers of Coos coun-ty will attend to the spraying this questions that present themselves, season, they will have a very extenhoping that experience and observa-tion rather than theory will ultimately bring desired results.

This is the old way of doing things In matters educational, and it is also the new way with this exceptionthat this is pre-eminently an age of rapid change and fads-when all change is progress, and every fad a scientific fact, an age when the man with the sober second thought is a fossil and the practical man a dead eight on the wheels of progress.

This is an age in which every man who has an ax to grind takes it to the schoolhouse grindstone; and the every man who has a fad to boost seek to convert every school district into a booster club. When it ceases boost his particular and peculiar fad be generally loses all interest ly educational matters, or cultivates a disposition to chronicle fault finding with the common school system.

To my mind the ax grinders and the fad boosters are in the educational saddle today, and to do much damage to the educational system that has proved so useful in the past and is pregnant with greater things for the future, if its would-be friends can be compelled to keep their hands off.

-A TEACHER.

O, VERY WELL.

(Contributed by a Lady Reader) After those convention capers, Dope and droll and snapshot views, Maybe now the daily papers Will begin to print the news.

I am weary of long speeches, Platforms, fights and fool cartoons. Print oh print of the price of peaches And new ways of cooking prunes!

FISHING IS GOOD

Some Good Catches Reported by Port Orford Tribune,

The Forty boys Monday morning ot out their lines below town and took them up in the evening with over 500 pounds of fish, among them four Lings, one being the largest ever caught here.

Lloyd Lackey with his small gato-Bne boat came dow

It's the Location

The accompanying clipping taken from the "Times" tells a story. "Location makes values." The best homes are being built on the South Side and the shrewd investor is placing his money in that part of the city. Marshfield must grow south and with its growth real estate values in that section will double. Invest now while the prices are low.

First Addition to Marshfield

The choicest section of the South Side; just a few minutes from the Fifth Street pavement and along its beautiful boulevard continuation. 50 foot lots, sightly and sheltered at but \$300 each. Just a short distance from those where the new homes are being erected and \$1000 lower in price. Investigate this property; the location is right, the price is right and we sell it on terms that are right. Let us hand you a plat.

BUILDING BOOM ON SOUTH SIDE

Work to Be Commenced On Four Large New Residences

On Fifth Street.

An incipient real estate and building boom is in progress on South Fifth street. Half a score of lots have changed owners in that section in the last few weeks and all are going into the hands of parties who will erect residences thereon. The latest transfer was made this

afternoon when Fred Weaver sold two lots in the block south of the Pat Hennessey residence to Dennis Mo-Carthy, the well known timber cruiser, who will begin the erection of a handsome seven room residence inpmediately.

Among the others who have pu .chased lots in that section for the purpose of building new homes are Messra, R. and N. Njerdrum, of the new pulp mill who have acquired five lots and will immediately commence the erection of two new residences. The Messrs, Njerdrum are now in Portland awaiting the arrival of their families from Finland.

M. Anderson, a brother-In-Jaw of J. E. Oren, has also purchased lots there and will erect a residence at once. Mr. Anderson left on the Breakwater Saturday for Minneapolis to bring his family to Coos Bay to make their future home.
