

# SOCIETY AND WOMAN'S WORLD

**PERSONAL** notices of visitors in the city, or of Coos Bay people who visit in other cities, together with notices of social affairs, are gladly received in the social department. Telephone 133. Notices of club meetings will be published and secretaries are kindly requested to furnish same.

**THE MUSICAL AGE**  
Now, in this phonographic age, No place is so remote, If it is found on foot, by stage, Or train, balloon or boat, But that one hears, on reaching it, Familiar voices and Is welcomed—which means quite a "hit"—

Perchance, by Sousa's band, That, with a crash of horns and drums, Plays: "See, the conquering hero comes!"

From hill and plain and mountain tall, Likewise on sea and shore, We hear Gadsdi and Melba call, Journal and Scotti roar, Though o'er the hills and far away, For quietude we flee, McCormack follows us to say: "I hear you calling me."

And wander 'round the world and back Caruso still is on our track. No more are we alone for, oh! It does not matter where We go—a journeying, we know Our friends are in the air (Or in their ails) about us and Must sing without surcease, Or else they'll play to beat the band, Some rousing march-time piece, Each traveler takes—these days of song— His own grand opera troupe along.

FOR most women it has always been good to be women. The maternal spirit, the capacity for unselfish love and the instinct for personal service have illumined her world of home. But the impulse to move on is driving woman out from the smaller world of home into the larger home of the entire existence of the world. Without losing love and loyalty to the home she is acquiring a place of her own in humanity's large life.

As she has moved out from the savage home into the life of the community she has given man the executive ability of such sovereigns as Maria Theresa and the spiritual courage of such saints as Catherine of Siena and Elizabeth Fry. She has enriched man's intellectual domain with the literary or artistic genius of such women as Sappho, Charlotte Bronte, Elizabeth Barrett Browning, "George Sand," "George Eliot," Harriet Beecher Stowe, Rosa Bonheur or Elizabeth Butler.

New modern life has developed a new and hitherto undreamed of class of women. These are the independent, professional or wage-earning women. They are challenged by a modern spirit and they accept its challenge.

This spirit is that of woman's essential equality with man, not in identity of functions but in equivalence of faculties. The challenge is to make the most of herself and to become more indispensable than ever to the world as its mother.

The women of the whole world, some of them consciously, most of them unawares, are assisting in the reorganization of modern society.

Women of the working class give of their scanty wages to save their daughters from losing their babies through the factory.

Average wives and mothers, helpless dependents financially on husbands, are giving of their modest means to obtain something better and more self respecting for their daughters than they themselves have experienced.

Women of the leisure classes are giving generously of their time, funds and energy to equalize the burdens of existence for their sisters.

The professional and wage-earning women are working harder than any other women for the secular emancipation of their sex.

This new woman, the modern woman, is working for the social redemption of humanity. To society regenerated she will be the woman of Eden, who was "the mother of all living."
