

**The Cooking Ware That Lasts a Generation**

"Wear-Ever" Aluminum Cooking Utensils are the kind that give you every satisfaction. Safety, Economy, Durability, Freedom from Worry.

You can cook the most delicate and easily scorched food in aluminum utensils with less fear of burning than in any other kind, because aluminum is a better distributor of heat and retains it longer.

This means a saving in fuel. And it means a saving in wear-and-tear expense, too.

"Wear-Ever" aluminum cooking utensils are strong, light to handle and easy to clean. They resist fire wear—you can let food boil dry in them without injuring the utensils. They are practically everlasting.

"Wear-Ever" utensils cannot rust, cannot form poisonous compounds with fruit acids or foods. They are made from thick, hard sheet aluminum, 99% pure, without seams, joints or solder.

Replace utensils that wear out with utensils that "Wear-Ever."

**PUZZLE ANSWERS.**

Editor Times:  
In answer to your puzzler I figure as follows:  
Your selling price is your basis of calculation and your final figure—so call it 100 per cent. Your profit is to be 10 per cent of that, and your cost of doing business is 22 per cent of that and these two added together make 32 per cent, leaving your invoice cost the difference between that and the 100 per cent, or 68 per cent.  
Therefore if the invoice cost is 68 per cent, or \$1.00, 1 per cent is \$1.00 divided by 68, or .0147 and 100 per cent is \$1.47.  
Respectfully,  
JAMES H. MILLS.

Partly Insured.—Mrs. S. A. Yoakam was in the city from her Coos River ranch today ordering lumber to erect a new temporary house until she can make plans for a residence. She happily discovered that an old insurance policy of \$800.00 was in force so that she will realize that sum for the loss she has sustained. She also had a \$300 policy on the furniture but as most of the furniture was removed nothing can be realized on it.
