PENSLAR HAIR TONIC

Penslar Hair Tonic is an exquisitely refined preparation for application to the scalp. It is best made use of after shampooing, and should be applied after the hair has been partially dried, rubbing it well into the scalp and continuing the massage until it is thoroughly absorbed. Used in this manner it will stimulate the glands which supply the natural oils to the hair, thus preventing it from becoming dry and brittle. If the hair is naturally dry and harsh, Penslar Hair Tonic should be applied every night, not neglecting the thorough massage of the scalp and roots of the hair which should always accompany the application of any hair tonic.

Both Penslar Hair Tonic and Shampona are splendid preparations for use in caring for the hair and scalps of children, and will effectually prevent the appearance of various scalp diseases which cause much annoyance in children and eventually lead to baldness in later life.
