

# ROYAL BAKING POWDER

Adds Healthful Qualities to the Food

*Prof. Prescott, of the University of Michigan, explains why Royal Baking Powder adds healthful qualities to the food.*

Testifying before the Pure Food Committee of Congress, the Professor stated that fruit acids were excellent articles of food and that of these cream of tartar, the acid of grapes, held rank with the highest both in itself and its effect in the process of leavening and baking. He regarded the results from cream of tartar baking powder as favorable to health. Scientists and hygienists are in accord with this opinion.
