

ROYAL BAKING POWDER

ABSOLUTELY PURE

Cooking is a matter which concerns the whole family, and under modern methods and conveniences it is made so attractive the whole family is becoming interested, if not taking part in it.

"These biscuits are delicious; this cake is excellent," says the father. "I made them," says the daughter, and both father and daughter beam with pleasure.

It is a crime, with our modern agencies, helps and facilities, to have soggy biscuit, or wooden cake, or leaden pastry.

Royal Baking Powder has made home baking a success, a pleasure and a profit, and the best cooking today the world over is done with its aid.

LOCAL GREEKS ARE LOYAL

Those in Coos County Will Fight If Their Country Needs Them.

Greeks in this locality are greatly interested in the warlike movements of their native country. In Coos county there are about 116 Greeks, many of whom have had military training in their own country. There has been a call for these men and they are willing to be sure that there is a war. The Greeks are very loyal to their native country and it is said that every Greek in the county would go back to fight for Greece if they find they are really needed.

John Arhos, one of the Greeks of this city, who is in the restaurant business, said:

"Every man would go back if he thought it necessary. You see, many of us are citizens of the United States, and we are not forced to go back to Greece, but when we are called and really need we should be there. This war means so much to our native country that Greeks in this country feel that they should give their help.

"If Greece should have a war with Turkey and should be defeated, she would lose everything, but if she wins she would be in much better condition than now, and many of the Greeks who are now under Turkish rule would be liberated. But if we lost we would lose our country, our king, our religion and everything. Because it would be a war on which the Greeks would be staking everything the Greeks in this country feel that they should fight if they are needed. If we did not respond to help our native land when she is in trouble, we would never be held there in the same respect as before.

"Many of us in this country would rather not see a war until four or five years from now. The country would be better prepared for warfare then than she is now. What we of Greek blood want to see is our country and our people back where they were formerly. Greeks are looked down upon and we want to see the Greeks raised to a higher position among nations of the world and command the high respect that the people of the country once had."

There are several natives of the Isle of Crete in this city and, too, would be ready to respond to Greece's call for men if they are needed.

Among the Greeks in this locality there are a number who are well educated and they all give a good deal of thought to their native land and are helpful and faithful to their fellow countrymen.
