LARGE ANNUAL APPLE CROP

The following is taken from the urrent issue of Farm and Fireside: "Growers and buyers are looking for another big apple crop this year. Certain parts of the East will produce quite as many as last year (prin-cipally the Hudson River district) but generally, in the East, Middle West, and West, reports indicate an aggregate yield bigger than for many years past. Never before has there been the demand for cold-storage gate yield space. The available space in the Kansas City cold-storage houses. which are among the largest in the country, has already been engaged by far-seeing buyers."
