Open all night. No sleep till morn where cats in concert meet. Free concerts every evening at which the very best cat talent on earth will appear in solos, duets and wild, wierd multitudinous chorus. Gentlemanly and affectionate Thomas Cats furnished old maids who feel the need of loving companionship and can do no better. Cash paid for cats and cat-esses of every grade. What fur? Fur fur, of course. Musical cats from which fiddle strings are procured preferred.

The usual get-rich-quick methods of the age compared to ours are as the pace of the snail that isn't in a hurry to the arrow-like flight of the excited jack-rabbit. If we cannot prove this to your entire satisfaction we agree to allow you to propose our names for honorary membership in Theodore Roosevelt's Ananias club, and to regularly attend the meetings of that great aggregation of distinguished liars.

Has it ever occurred to you as a shrewd business man that there is money in cats. Just plain, ordinary, everyday cats, with no pride of ancestry or hope of future distinction? There is, dead codles of it, and if you wish to become a bloated accumulator of untold riches, study well our scheme, and then go to it.

We propose to establish on Nob Hill a mammoth cat ranch with a capital stock of \$75,000,000 divided into 75,000,000 shares of a par value of One Buck each. We will begin to do a business that will make the fur fly with a working stock of 1,000,000 cats. The original promoter of the scheme was the author of the Shorter Cat-echism now in use in many churches, and as a result of overwork upon that popular production he has ever since been afflicted with cats on the brain. This has been a benefit to him, for because of cats in that region he has never been afflicted with rats in his attic.

Now, Mr. Wealthseeker, just study these figures and if they do not show you how a perfect cat-aract of wealth will flow down upon you until it will almost throw you into a cat-a-leptic fit, your foresight must be a darned sight dimmer than your hindsight.

Take 1,000,000 cats as a working

basis. It is a well known scientific fact that one cat that is an adept at the business will manufacture and turn out in a finished states 12 kittens a year. This will place in our hands 12,000,000 skins a year to sell at prices ranging from 10 cents for pure white, to 75 cents each for black; an average, we will say, of 30 cents each. Twelve million skins at 30 cents each will yield an income to the company of \$3,000,000 a year, or \$300,000 a month or just \$10,000 a day from skins alone. Cat-ch on? It is estimated by experts in skin games that one man can skin 50 cats in a working day of 10 hours. Adept skimmers can be hired for \$50 each and board at an expense of, say, \$1 a day each, for average feeders. It will require a working force of 100 men to operate the cattery which makes the expense for labor \$200 a day, leaving a net profit of \$9,800 a day or \$294,000 a month to be divided among the shareholders. Doesn't that dazzle you?

In order to feed these cats we propose to operate a rattery adjoining the cattery. Competent authorities who have made an exhaustive study of ratology agree that rats multiply four times as fast as cats, hence with an industrious stock of 1,000,000 rats there would be a product of four rats a day for each cat not possessed of an abnormal appetite. This will supply cat food without cost as no herders would be required to keep the rats on the reservation, it being a well known fact that when a rat establishes itself in any place it hangs out the "Here to Stay" sign. In order to feed the rats the carcasses of the skun cats will be thrown to them, and as we will have one-fourth as many cats to kill as we have rats to feed, we will have one-fourth of a cat's corpse each day for each rat. Thus it is seen that the rats will feed the cats and the cats will feed on the rats and both will contribute to the feeding and fattening of the bank balances of stockholders with no expense to the company.

We are in correspondence with several large manufacturers of fiddle strings with whom we will no doubt close contracts for the intestines of the cats at profitable figures, thus adding greatly to the revenues of the company, and the bones of the cats and rats are now being negotiated for by a reliable firm of breakfast food makers in Michigan.

If you wish to get in on the ground floor of this fortune building proposition you will have to hurry and at once get busy with your checkbook before the rush begins and the local banks find it impossible to handle the paper.

As an inducement of a glittering nature which will appeal to every amusement lover a ticket to the "Big Noise," the minstrel and vaudeville entertainment to be given by the Marshfield B. P. O. E., will be presented free of charge to the purchasers of each \$1 share of the capital stock of the cat ranch. Address all communications and make all checks payable to

President Marshfield Pussy Cat Ranch, Room 23, Millicoma club.
