'FRISCO HAS A WATER PROBLEM

Golden Gate City Has Question to Solve Similar to Marshfield.

The following from the San Francisco Call will be of interest to the residents of Marshfield, who are wrestling with the same city water works problem that is worrying the residents of the big California city: "That San Francisco must possess her own water supply, and since the property of the Spring Valley Water Company is the only available supply that company must agree to sell out to the city for a just and equitable figure, is the belief of nearly every citizen approached for an opinion on the subject.

"Every public official had declared in favor of the acquisition of the property, for they realize better how helpless is a community which is dependent for its very life on a corporation over which it has no control.

High Enough, Says Cashin.
"Thomas A. Cashin, superintendent municipal railway, 242 Laurel street, "I believe that the offer of \$37,000,000 made by the city to Spring Valley and half the impounded money is liberal and should be accepted. The matter has been thoroughly investigated by City Engineer Long, Mayor Rolph, Judge Curtis H. Lindley and Supervisors Vogelzang and Jennings, members of the advisory water committee. We should rely upon their judgment. Extensions to outlying districts necessitates the purchase of Spring Valley.

Must Have Water Plant.
"J. D. Galer, collector, 445 O'Farrell street, "I certainly favor municipal ownership, and believe that the city should acquire the Spring Valley properties upon the best terms it can obtain. We must have the properties at any cost to give an adequate supply of water to the outlying districts."

Points to Geary Road Success.
"A. T. DeRome of the J. Charles Green Co., residence 1573 Shrader street: "If the city can take hold of the Spring Valley water works and make the wonderful success of it that it has of the Geary street road I favor acquisition of the properties at whatever figure can be agreed upon by both sides. I believe in municipal ownership when the management and conduct of a public utility is based upon sound business foundations, and not made the roosting place of politicians. As to what is a fair price for Spring Valley and as to what the company should be willing to accept, those are matters to be determined by experts representing both sides."

City Alone to Supply Suburbs.
"C. H. Scott, deputy sheriff, 1215 Castro street: "The city should own the Spring Valley water system, thereby giving relief to the outlying districts, which are now suffering from an inadequate supply."

Condemnation Best, He says.
"E. W. Maslin, deputy naval officer, custom house: "I am positive the city of San Francisco should own all public utilities, such as light, water, fuel, gas and streetcar service. Condemnation proceedings under the protection of the law, with a judge and 12 jurors, experts and reports in regard to the true condition and value of the water plant, is the best way for San Francisco to acquire the Spring Valley property. Legal arbitration by statute is effective, but not as good as condemnation proceedings. Arbitration without the protection of statute, or voluntary arbitration is useless, because each side can decline to abide by the decision."

Get Property Quickly.
Colonel George Stone, naval officer of the port: "Get the Spring Valley Water Company's property for San Francisco the quickest way possible. The city should own its own water supply, which is just as necessary to life as the air we breathe, and a community should not depend on the whims of a private corporation as to whether or not they are to be supplied with water."

Use Business Methods.
"C. B. Bunker, customs broker: "Acquiring the Spring Valley Water Company's property, which the city of San Francisco should do without more delay, should be like any business deal. Both parties should be willing to give and take a little. I favor arbitration in such matters, but if a price cannot be reached in that way the matter should be taken in to the courts for condemnation."

Favors Arbitration.
"Joseph L. Bley, customs attorney: "Under the present administration I favor arbitration in regard to the city of San Francisco acquiring the Spring Valley property. Under a doubtful administration I would favor condemnation proceedings. In either case the city should own its water supply."

"Benjamin McGowan: "The city of San Francisco should own its water supply. I favor acquiring it by arbitration."

Requires Deep Study.
"James T. Bailey, secretary of San Francisco Machinists: "This matter of the purchase of Spring Valley property is a deep question that will require a great deal of study by the average citizen before he can form an intelligent opinion as to the price of the plant for municipal purpose. Great care should be exercised in this matter."

Mrs. S. S. S., Van Buren St., Kingston, N. Y. (full name furnished on application) had such decided benefit from using Foley's Honey & Tar Compound that she shares her good fortune with others. She writes: "Foley's Honey & Tar Compound brought my voice back to me during a severe case of bronchitis and laryngitis. Oh, how many people I have recommended it to. Sold by Lockhart & Parsons, the Busy Corner."

BUSINESS FOR PANAMA CANAL

Reports of Freight That Will Be Shipped Back and Forth Through Water.

WASHINGTON, Feb. 8.—Commerce between the Atlantic and Pacific Coasts of the United States via the Isthmuses of Panama and Tehantepec aggregated approximately \$125,000,000 in 1912. The rapid growth of the traffic between the eastern and western coasts of the United States via the Isthmuses which developed chiefly within very recent years and seems likely to further increase with the opening of the Panama canal, led the statistical division of the Bureau of Foreign and Domestic Commerce to establish at the beginning of the present fiscal year a monthly record of the movements of the principal articles forming this traffic. Its record for the five months ending with November has just been published and shows \$24,500,000 worth of merchandise passing from the Atlantic Coast to the Pacific Coast via the Tehantepec railroad and \$5,000,000 worth via the Panama railroad; while the value of the traffic from the Pacific to the Atlantic Coast was, via the Tehantepec line, \$14,333,000, and via the Panama line, \$3,750,000. This suggests that the total value of the traffic for the half year ended December was approximately \$30,000,000 westbound across the Tehantepec route and \$6,000,000 via the Panama line; and of eastbound coming from the Pacific Coast Ports and Hawaii, \$16,000,000 via the Tehantepec line and \$4,500,000 via Panama; and that the total value of this traffic for the full year approximates \$125,000,000.

The principal articles forming this interchange between the Atlantic and Pacific Coasts are, in the westward movement, iron and steel manufactures, about \$8,000,000 for the half year ended with December; cotton cloths, about \$3,000,000 for the half year; paper and manufactures thereof, nearly \$3,000,000; manufactures of wool, \$2,500,000; chemicals, approximately \$2,000,000; smoking tobacco, about \$750,000; vegetables, nearly \$1,000,000; manufactures of India rubber, approximately \$500,000; manufactures of copper, between \$1,000,000 and \$2,000,000; boots and shoes, about \$350,000; cotton wearing apparel, \$1,500,000, and mineral oil, about \$500,000 in value.

The principal articles forming the \$8,000,000 worth of iron and steel manufactures are machinery, nearly \$1,000,000; building hardware, more than a half million; nails and spikes, about one-third million; sheets and plates, about one-half million, and tools, about one-half million dollars.

The merchandise shipped from the Pacific Coast to the Atlantic seaboard, included about \$1,500,000 worth of canned salmon; nearly a half million dollars' worth of raisins; more than a quarter million dollars' worth of prunes; more than \$1,500,000 worth of preserved fruits; \$2,000,000 worth of wines; and nearly \$2,000,000 worth of wool, while sugar shipments from the Hawaiian Islands amounted to over \$7,000,000 in value for the five months in question.

Considerable quantities of merchandise bound for foreign countries also utilize now the trans-Isthmian routes. Shipments from the Atlantic Coast to foreign countries via the Isthmuses go chiefly via the Panama route and include for the six months ended with December, approximately \$1,500,000 worth to Peru, nearly \$1,000,000 to Ecuador, about two-thirds of a million to Chile, and about \$2,000,000 worth to the Central American States. The eastbound traffic from the Pacific Coast to foreign countries amounted to about \$4,000,000 value for the six months, the largest single movement being from San Francisco to Germany, \$1,750,000 value; while that to France was about \$650,000 and to England about \$350,000 in value.

CASTRO STILL FREE.

Undesirable Given Another Week's Time in New York.

(By Associated Press to Coos Bay Times.)
NEW YORK, Feb. 7.—Cipriano Castro, ex-president of Venezuela, will have at least another week of liberty before the federal court renders a decision in the matter of the habeas corpus writ recently obtained in his behalf. Castro's counsel and counsel for the government argued for an hour this afternoon before Judge Ward for and against the writ, after which the court granted a week's time for each side to file briefs. Pending the decision Castro will be free to come and go as he pleases under bonds.

EVEN A POSTAL CLERK IS MADE MAD BY BAD WRITING.

Old Employee Tears Up Troublesome Letter to Get Rid of It.
LOS ANGELES, Feb. 7.—That the troubles of mail clerks with mis-addressed letters and illegible handwriting frequently are sufficient literally to drive one mad, was exemplified here in the case of E. W. Gale, aged 70, a postoffice employe for nineteen years, who was charged with having torn up a letter that had been sent to numerous addresses in the hope of finding the owner, but always came back unclaimed. Gale was charged technically with "embezzling of mail," but the postal inspectors who arrested him were convinced that the invariable return of the letter had worried him to the point of mental aberration, and they decided to drop prosecution.

MACHINE-MADE BABES PREDICTED BY SAVANT

Harvard Doctor of Philosophy Says Human Life Will Be Produced Chemically.

BOSTON, Feb. 6.—That it is scientifically possible to create human life by chemical and physical means and that a baby factory is not at all an impossibility, though in the distant future, was asserted by Dr. Martin Kellogg Schermerhorn of the Department of Philosophy of Harvard. Dr. Schermerhorn spoke before the Metaphysical Club.

"Life is not confined to the animal and plant world," he said. "The whole universe is alive. And all that lives is conscious.

"Animals are conscious and gifted with power of thought and imagination, even thought Roosevelt, who thinks himself a great hunter, says that they do not know when they are being brutally slaughtered. "Plants are conscious. Ruskin and Goethe agree that they are capable of exercising strategy and forethought.

"Hence it is obvious that the evolution from so-called matter to human life is possible. "The chemist of the future will labor so that men will be made in baby factories as chickens are now hatched in incubators."

TREE GROWS AROUND WATCH LOST IN 1883.

ST. LOUIS, Mo., Feb. 7.—As Michael Huelising and his nephew, Michael Dambacher, were chopping down an apple tree on the Huelising farm near Bellevue, they found a silver watch imbedded in the tree about two feet above the ground. The timepiece appeared to be in perfect condition, although tarnished considerably.

Inquiry among old residents of Freeburg revealed that a fight had taken place thirty years ago close to where the tree stood. Thomas Damm remembered that one of the fighters had placed his watch in a hole in a small apple tree.

The timepiece never was regained and it is believed that as the trunk grew the hole was closed completely around the watch.

"It was along in the fall of 1883," Damm said, "when two farmers quarreled over a girl and decided to fight it out on the Huelising farm. "Before the struggle one of the men relieved himself of his watch and in the excitement went away without it."

When Burton Holmes recently gave his celebrated travelogue on "Panama" at Orchestra Hall, Chicago, he was seriously interrupted by continual coughing of the audience. No one annoys willingly and if people with coughs, colds, hoarseness, and tickling in throat, would use Foley's Honey & Tar Compound, they could quickly cure their coughs and colds and avoid this annoyance. For sale by Lockhart & Parsons, the Busy Corner.
