GET MONEY FOR BONDS IN MONTH

Thirty Days Must Elope to Allow Enactment of New Ordinance.

A special meeting of the Port of Coos Bay Commissioners has been called for 8 o'clock this evening at the Marshfield Chamber of Commerce to pass some additional ordinances and resolutions to clear up the details for the sale of the \$200,000 bond issue. The ordinances and resolutions are of a minor character but are required by C. W. McNear and Company before they will advance the money on the bonds.

In a letter today requesting the additional actions, the McNear Company says that their bond attorneys found no vital or serious defects at all. However, it will be necessary for thirty days to elapse after the passage of the ordinance before the money can be paid, that length of time being required to eliminate the possibility of the recall being invoked on the ordinance.

In their opinion on the abstract of the bond, Caldwell, Masslich and Reed, the noted bond attorneys, pay a high tribute to Mr. Peck's work in preparing the abstract. They say:

"It is not often that we make any favorable comment upon a transcript submitted to us but we cannot refrain from saying that this record you have sent us shows unusual care and skill in its preparation and in handling the many extremely difficult questions that were presented to the attorneys who had to do with the organization of the port and the issuance of the bonds."

It is stated that the bonds are being printed and will be forwarded here at once to be signed and prepared so that the money can be turned over to the Port of Coos Bay soon after the new ordinance goes into effect.

HIGH VOLTAGE IS RESTORED

Manager Green Makes Change in Service—Explains Why It Was Lowered.

D. C. Green of the Oregon Power Company announced yesterday that the high voltage service would be resumed last night as a result of the criticism of the service offered at the last meeting of the city council. He said that the high voltage had been reduced some time ago in order to make the service better but if the old service was desired, they would give it.

Mr. Green said that the high voltage was reduced because of the many complaints about incandescent lamps not lasting as long as they should. He said the high voltage was burning them out and the strong current was not beneficial to anyone. He further stated that furnishing the lower voltage was just as expensive to the company as the high voltage as the contracts with the Simpson Lumber Company and the C. A. Smith Company was on either a flat rate basis or had a minimum fixed which was more than the company used. He said that an increase in the voltage would also mean an increase in the monthly meter charge, more electricity being used under the high voltage than the lower.

Mr. Green will probably appear at the next meeting of the city council and explain the matter to the council.

ANOTHER BANDON BOAT.

Steamer Grace Dollar's Crew Given Reception by Citizens.

BANDON, March 13.—Citizens of Bandon are much elated at the entrance into this harbor of the new Dollar boat, the steamer Grace Dollar, which has been specially built for the Coquille river. The vessel is one of the finest plying on the coast. She is 230 feet long, has a beam of 16 feet and depth of hold of 16 feet. She is of steel construction throughout and fitted with 1000 horsepower engines.

A reception was given the officers and crew of the steamer Grace Dollar, by the Bandon Commercial Club, at the club's handsomely fitted hall. G. T. Treadgold, George Topping and E. Fish made speeches of welcome. The carrying capacity of the Grace Dollar is 1,200,000 feet. This is the second large steamer that has been put on the Bandon run within the last three months.

Five years ago it was difficult for two masted schooners to get into the harbor, but the extension of the jetty by the government so improved the harbor that large steamers are able to come in here successfully. The results obtained from work on the harbor have been so great that it will encourage still further improvements.
