

Dayton Motorcycles

'Dynamite'

That's the nickname for the Dayton in Portland and several of the best riders in Marshfield assure that it is appropriate—ask them. I don't care to give their names—but ask some of the good riders if they have been on the Dayton and what they think of it.

Personally, all I know about motorcycles is, that they come from the east in box cars.

This I do know, however, that the Daytons have strong features—from handlebars to mud guards, the handlebar grips can't break off like others, the motor is something that will appeal to any mechanic, and every part that I have seen seems to be of refined construction.

I confess that the Dayton does not sound much like a German Band, while moving along, nor will I claim that one can be run 2000 miles on 10 cents, one of the other dealers claims for his machine, but the Marshfield Cyclery guarantee will protect every buyer of a Dayton, or any other article sold by us.

Next Sunday we will be pleased to try our machine out with any others on any hill that may be suggested.

We never exaggerate in our advertising. We never state anything which we do not believe to be true.

We now have in our employ a man who knows motorcycles from A to Z and who is no knocker and we solicit repair work on any make of machine.
