The designers have displayed unusually good tastes in this season's creations. And not withstanding the beauty of our models and the superior grades of the materials, we adhere strictly to our policy of pricing each article at a modest margin of profit.

## The Reputation That Assures the Worth

There are several ways to determine the superiority of **PENSLAR PRODUCTS**. For instance, by chemical analysis—but that would be slow, troublesome and expensive. Or by a large number of cases—but that is unnecessary, for it has already been done thousands of times. But here is a more convincing fact—The Penslar Line is the only line made by a house which does a large pharmaceutical business, and the reputation of this house for its fine pharmaceutical products (fluid extracts, elixirs, pills, tablets and other staples) is of the very highest—second to none.

Many of the Penslar preparations are simply well known standard pharmaceuticals in popular form, and the line throughout conforms to the standard of excellence required for the best prescription products.

They wouldn't dare to sacrifice **QUALITY**. They could not afford to jeopardize their pharmaceutical reputation. Their every interest demands that their products be of the highest grades. **BESIDES** they know as you do that the great factor in building up Penslar business, is the **QUALITY** that brings repeat sales.

**ANOTHER THING**—They print the full formula of each Penslar remedy on the label so you can see it. Wouldn't it be suicidal for them to throw their formulas wide open like this unless they were sure they were proof against criticism? This is sound logic and you know it.

**PENSLAR QUALITY** can be proven in many ways—but the most satisfactory proof is a trial. Once tried, you will never use any other.
