No. 6. THE CULEBRA CUT

1912, by The Associated Newspaper School, Inc

Abandoning the pitifully inadequate outfit left by the French, our country replaced it with modern steam shovels and hundreds of dirt cars hauled by American locomotives. The great hills shook and the jungles echoed the roar from the explosion of thousands of pounds of dynamite, used to tear away the face of the mountains to allow the shovels to nose their way through on their slow but sure journey to the Pacific. Since 1905 an army of workers guided by the ingenuity of American engineers has blown apart, shoveled up, and carried away 88,550,000 cubic yards of earth from Culebra Cut. Today the work is 90 per cent completed.

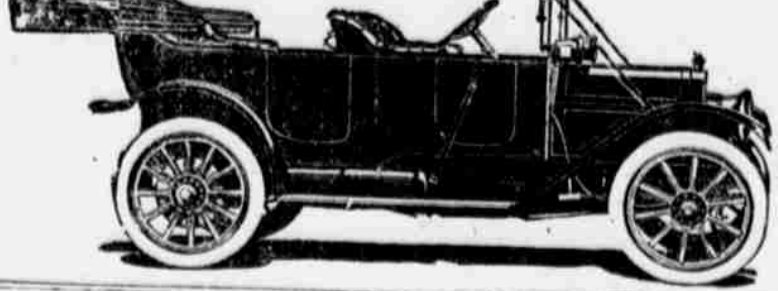

The best view of the cut is to be had from the top of the bank opposite the town of Culebra. More than half a mile across is the opposite bank. Hundreds of feet below are the shovels, dirt trans, and hundreds of men at work. From this great height they look like tiny specks.

Through general yellow fever epidemics and constant tropical diseases and intense scorching sun, the men on the job have labored steadily day after day to accomplish this wonderful work, until now it is practically finished. This excavation is so immense that any ship crossing the Atlantic Ocean today could easily be buried in it.

Every day a different human interest story will appear in The Times. You can get a beautiful intaglio reproduction of this picture, with five others, equally attractive, 7 by 9 1/2 inches in size, with this week's "Mentor." In "The Mentor" a well known authority covers the subject of the pictures and stories of the week. Readers of The Times and "The Mentor" will know Art, Literature, History, Science, and Travel, and own exquisite pictures. On sale at The Times office. Price ten cents. Write today to The Times for booklet explaining The Associated Newspaper School plan.

Electric Lighting Means Real Home Comfort

One hundred years ago the family gathered around the dim light of a tallow candle—or drew up as close as the heat would permit to the flickering light of the old-fashioned log fire. Reading or sewing at night in those days was a hardship—little wonder our ancestral eyes failed before their time.

Today a single 60 watt tungsten (Mazda) electric lamp will give 48 times as much light as the candle of a century ago—and the light is steady—soft—white

Electric light is the first aid to home comfort. Did you ever investigate its cost? It will surprise you to know how little it costs to wire an unwired house. Telephone 178 and let us submit an estimate on your property.

NEGRO TELLS ABOUT MURDER

Superintendent Leo. M. Frank of Atlanta Factory Held for Girl's Death on Testimony

(By Associated Press to Coos Bay Times.)
ATLANTA, Ga., May 31.—Additional details of the alleged confession admitting knowledge of the murder of Mary Phagan, which the police claim was secured from Jas. Conley, a negro, were made public today. Conley was an employe at the pencil factory where the girl's body was found and had been under arrest for several weeks. According to the police, Conley was alleged to state that Leo M. Frank, superintendent of the factory, sent him into the room of the plant the day the girl disappeared. He found her body, according to the police, and it was taken to the basement where it was found by night watchman Newt Lee early the next morning. In the latest alleged confession the negro was alleged to have said that he wrote the notes found beside the dead girl's body at Frank's dictation just after the body had been carried to the basement.
