

IN THE NICK OF TIME

FIRST ADDITION TO MARSHFIELD

This is the very time to build the home you have been planning to build. Just now, before building operations become more active and while carpenters can be secured for the work and when you can spend more time in superintending the job. Lumber can be bought cheaply now and on good terms.

Right now you can get a building lot close to the best residence district of Marshfield, in First Addition to Marshfield, a level, 50-foot lot on a graded street. Buy it for \$25 cash and \$10 per month, and be your own landlord. You can do it as well as others, and there's no doubt about it being the thing to do.

Call on us and talk over your ambitions in this direction with us.

Gas Range Cooking The Scientific, Sanitary Satisfactory Way

Start the spring right by getting your wife a gas range. Cooking with gas is not only scientific, sanitary and completely satisfactory, but it is economical. You don't waste fuel or time in firing up.

Hot summer will soon be here. With a gas range your wife can prepare a meal quickly without heating the whole house, and without spoiling her temper or ruining her health.

At preserving time ask her if she wants to go back to the old range. We know what her answer will be—and we also know that by that time you will not need to ask the question.

In the fall if your house heating system does not provide heat for the kitchen—the problem is solved by installing a Kitchen Heater, the little running mate of the gas range.

Be sure to see the 1913 gas range models at your dealers. A few of the new features are: Ovens with glass doors and thermometers; ovens above instead of below; convenient shelves; non-oxidizing metal.
