

WANT TO ENTER SIUSLAW LAND

Report That 25 Marshfield Families Have Made Application

WASHINGTON, Jan. 27.—Twenty-five families at Marshfield have submitted through Representative Hawley a plea for permission to settle on burnt over lands in the southern part of the Siuslaw National forest.

LONDON HAS HUGE STRIKE

(By Associated Press to Coos Bay Times.)
LONDON, Jan. 27.—Two hundred thousand union men employed in the building trades in London quit their labor for the week-end holidays Saturday and said they would not return to work until the employers withdrew their demand for the open shop principle.

HOUSE PASSES APPROPRIATION

(By Associated Press to Coos Bay Times.)
WASHINGTON, D. C., Jan. 27.—The Postoffice appropriation bill, carrying the record-breaking total of \$305,000,000, was passed by the House. It includes an amendment which extends to Postoffice clerks, letter carriers, rural free delivery carriers, mounted letter carriers and postoffice messengers, for injuries received on duty, full salary for one year if necessary, and \$2000 lump sum payment in case of death.

GARAGE SHOP IS A MARVEL

GOODROADS GOODRUM'S SERVICE DEPARTMENT WORTHY OF SPECIAL INSPECTION—NEW FACTS ABOUT FORDS.

You ought to take a trip to the Goodrum Garage today or tomorrow and see the service department that is being maintained there for the benefit of Coos County motorists. All the motorists know the extent and value of this service, but the general public doesn't and if you are the least interested in mechanics, it will be an hour well spent.

Incidentally it will give you a little insight just now into the wonderful simplicity of the Ford cars. One of the machines was taken apart recently, stripped completely. You may have seen other autos, high priced machines, with their numerous parts and intricate works and marvelled that they did not get out of "whack" more often than they do. When you see the Ford apart, your misgivings about the likelihood of troubles with an auto will disappear.

Simplicity and accuracy in the first construction are the prime features of the Ford. Both are money savers for the makers and money-savers for the owners, not to speak of the elimination of the

COLDS TO BE TAKEN SERIOUSLY

Intelligent people realize that common colds should be treated promptly. If there is sneezing and chilliness with hoarseness, tickling throat and coughing, begin promptly the use of Foley's Honey and Tar Compound. It is effective, pleasant to take, checks a cold and stops the cough, which causes loss of sleep and lowers the vital resistance. Owl Prescription Pharmacy, Frank D. Cohan, Opposite Chandler Hotel, Phone 74.

A SMART SPORTS COAT MODEL

The sports coat has evidently come to stay. Woman for all her love of fluffy, impractical clothes is quick to grasp a style that is useful and becoming at the same time. The sports coat is usually made of the lightest and wooliest of materials and is warm and handy to slip on over the one-piece frock for a morning's shopping or for a game of golf. The bright colors, vivid greens, reds and blues are popular and rather bright plaids. Tweed mixtures in somewhat quieter grays and browns will appeal to the more conservative and are quite as smart.

Emerald green bouclé is used with 8128. The skirt is a brown tweed mixture.

This coat is cut with body and sleeve in one and may be worn closed over the side front with the collar in high turn down effect or may have the

fronts turned back to form revers and the collar turned down to form a point on either shoulder.

It requires 4 1/2 yards of 42 inch material to make this coat in size 36. No. 7207 is a three-piece skirt closing in front with just a suggestion of fullness at the belt in back. It may be made in size 24 with 2 1/2 yards of 42 inch material.

Every day new designs for the one-piece frock appear. In this model of rose colored eponge we have the drop-shoulder, a blouse that closes surplus fashion and a smart yoked skirt.

Black satin collar and cuffs give the necessary relief.

This dress may be copied in size 36 with 4 1/2 yards of 36 inch material.

No. 8128—size 32 to 44.
No. 7207—size 22 to 32.
No. 8098—size 34 to 42.
Each pattern 15 cents.

To obtain either pattern illustrated fill out this coupon and enclose 15 cents in stamps or coin. Be sure to state number of pattern and size, measuring over the fullest part of the bust. Address Pattern Department, care of this paper.

troubles that marked the life of the automobilist before Ford took the field. The following statement from the Ford factory gives a little insight into the methods they use which enable them to put a thoroughly reliable car on the market at the price they do:

Save Precious Time.
The work of turning out Ford cars abounds in minute details of production which save precious minutes.

A unique method is used to test cylinders to ascertain if they have been bored accurately to a thousandth of an inch, this simply allowing for the movement of the piston head.

By old machine shop methods the cylinder was bored out and the piston head turned and then one was fitted to the other. When Ford production ran up into the hundreds of motor cars per day it was obviously impossible to test in this way, as cylinders were bored in one portion of the plant, while the pistons were being turned a great distance away.

A device was therefor worked out in which an electric globe is used to make the test. When a cylinder has been bored to the correct size it is slid over an electric globe. A piston gauge of the exact size of a piston head is then slid into the cylinder and the tester examines it carefully to ascertain if any light leaks around the gauge. If there is no sign of light it means that the cylinder has been bored properly, but if light shows, the cylinder is rejected as defective.

Tests of Motor.
No matter how carefully a motor has been tested before assembly, it is always hard to start when the assembling is finished. This has always meant laborious cranking or the spinning of the motor by a self starter in the plants whose product is equipped with a starter.

The difficulty was solved at the Ford plant at Detroit in a unique manner. Pulley wheels revolving at high speed were sunk flush with the floor in the assembly room. When a car has been set up (and in the rush season they are going through at the rate of 1000 per day) no effort is spent on turning the engine by ordinary means, but the rear wheels are placed on the floor pulleys, after the gears have been meshed. This soon warms the motor and when the first puff of the exhaust announces that the engine is working itself, the car is released from the pulleys and runs out on the loading platform.

Other things being equal, the man sells the most goods who most frequently and most persuasively asks people to buy. It pays to ask.

QUIT MEAT WHEN KIDNEYS BOTHER

Take a Glass of Salts Before Breakfast if Your Back Hurts or Bladder is troubling you.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which excites the kidneys, they become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood, then we get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, dizziness, sleeplessness and urinary disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, stop eating meat and get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast and in a few days your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate the kidneys, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder weakness.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active and the blood pure, thereby avoiding serious kidney complications.
