Let the Central Station Carry Your Power Plant Investment

Electric motors operating by central station service, give flexibility, reliability and economy.

Electric motors require less space and cost less per unit of energy than any other form of power machinery.

More space can be devoted to production with a greatly reduced investment in power plant.

Central station electric power is always ready to turn the wheels of any power user—every hour of the day or night. It prevents loss of time and production incident to private power plant shut-downs.

We want to prove that electric power is more economical for you. Telephone 178 and ask our representative to call.
