

"DO IT ELECTRICALLY."

Thos. A. Edison Said:--

"All users will obtain this light, heat and power from electrical distribution stations."

CENTRAL STATION POWER is most flexible and most economical. Central Station service gives you power WHERE you want it and WHEN you want it in the EXACT quantity you need. No over-production of power when your plant is not running capacity—no under-production when your power need increases.

Investigate the Economy of Individual Drive Motors

Have you ever stopped to consider the economy of Central Station power over the operation of your private plant? Have you ever figured the exact cost of installing economical individual drive motors in your factory?

Why don't you decide now to let our expert on factory power make a study of your power problems and prepare actual statistics for you? Central Service power can cut factory costs for you just as it has for hundreds of other forward-looking men.

Insurance Company Decides to Pay Policy and Let Her Go.

The Florence West says: The insurance agent who was looking over the wreck of the barge Fredrick is reported to have said that "The best thing we can do, I think, is to pay the insurance and let her go." This means a very heavy loss as well as delay for the contractors.

A high tide and rough sea, caused her to pound her way through the jetty onto the North Spit, where she now lies with the three scows intended for her use on Whoahink and Milcoos lakes, and several hundred tons of iron rails on board.

The Bandon Surf says: The damage suit of Robert E. Taylor against the Merchants Protective Association of this city will come up for hearing shortly in the Circuit Court. This suit is the result of the publication in one of Bandon's papers of a blacklist issued and authorized by the association in which the name of the defendant, in common with many others, figured rather prominently. We are informed that the present case will be regarded as a test case and if it proves successful a large number of suits will be filed immediately.

CURRY CHICKEN THIEVES

Steals Setting Hens and Mothers of Broods of Little Chicks.

The Gold Beach Globe says: Some chicken thieves entered the chicken house of Geo. W. Smith and stole some chickens, took them to the beach, built up a bon fire and roasted them. The parties were either not particular what kind of chickens they ate, or were poor judges of what would make good roasts, as they took two old setting hens, one of which would have come off in a few days with her brood, and the other one had a brood just a few days old. We understand that the identities of the parties are known and that the matter will be taken up before the grand jury.

The ring ceremony was observed under a bell of cherry blossoms in the parlor, which was beautifully decorated with cherry blossoms and lilacs.—Myrtle Point Enterprise.

SOME PULLET EGG.

Claude Moon brought into this office the largest pullet egg ever saw. It was laid by a Plymouth Rock chicken which furnished her first egg only a week previous, on April 6, and yet measured 6 by 7 3-4 inches. If this young hen can now emulate the example of Madame Corvallis in the number of eggs laid in a year she will be a world beater.—Coquille Sentinel.

COQUILLE PHONE LINE.

Some of the boys are beginning to work out and there is every evidence that Bandon will have one of the fastest baseball teams in her history.—Bandon Recorder.

CLOSE MYRTLE POINT LAUNDRY

Chas. Kitcher, who for about a year and a half has been conducting a hand laundry here, last week sold his laundry outfit and household goods to Nelson, the second hand man, and discontinued the business. Mr. and Mrs. Fitcher left last Saturday for Seattle, Washington, where they go to be with the gentleman's father, who is in his ninetieth year and has been unwell for some months.
