coming here that Mr. Tolman had turned his horses out upon his homestead, situated on upper Chetco river, while he made his official round of the southern part of the county. The unexpected heavy snowstorm came on and the horses could not be found. They had strayed from the range and when they were at last found both were dead. It is thought here that they must have been killed by falling timber.

## THE FORD CAR WON ON MERIT

The Recent Race to Bandon Proved Efficiency of Ford In An Emergency.

George Goodrum has made a decidedly interesting display in his garage window of the features in the recent race-winning trip of the Ford from North Bend to Bandon. It includes pictures of the car on its return and the many parts of the Ford auto which are carried in the service department of the Goodrum Garage.

There has been much interest manifested by automobile enthusiasts in the remarkable performance of the Ford on this race-winning trip. The time was so remarkable, except in the fact that it was done in a rainstorm over mountain roads that were in a condition considered almost impassable. The Ford proved its efficiency as the car for all kinds of roads in all kinds of weather.

Other cars devote themselves to this, that and the other thing. One time it's hoary for this, another it's hoary for that, and then it's hoary for something else.

All of which is nothing more than an effort to magnify the value of non-essentials to the exclusion of those really big things which make a motor car that is worth while.

The big things are stability, endurance, constancy, power, comfort, satisfaction and service.

These are essentials which are obtainable in the Ford and these are the things which the winning of this race in a rainstorm demonstrated. On a sunny day and a paved street, most any car will make a showing, but it is in the emergency that the Ford demonstrates its efficiency. Most people already know this, else why should the sale of Fords this year exceed those of all other makes combined.
