

AERIAL FERRY FOR OAKLAND

First Regular Air Transportation Line to Be Established in California City.

(Special to The Times.) OAKLAND, Cal., April 29.—The first aerial ferry building in the world is being constructed in Oakland. It will be completed shortly and the ferry itself will be in operation within two months.

The "ferry" building, or hangar, is going up at the foot of Washington street, and will be the headquarters of the new aerial line from Oakland to San Francisco. One of the "boats" is already here and three more are on the way.

Each hydroplane is capable of carrying 1000 pounds, which means at least three passengers and the aviator, or more passengers if they are light ones. As fare is to be charged on a basis of weight—four cents a pound—fat men will be more welcome than lean ones as passengers.

The hydroplanes that will be used in the ferry service will make Oakland their headquarters. A landing place has been secured at the foot of Washington street, and landings will be made on a huge floating pontoon.

The planes are not high flyers, the promoters of the plan saying they will not rise more than thirty feet in the air during the trip across the bay.

SPUDS AND HOW TO GROW 'EM

Government Issues a Bulletin of Interest to Potato Growers Everywhere.

WASHINGTON, D. C., April 29.—Irish potatoes are one of the easiest and most profitable suburban crops. They may be grown on almost any type of soil which possesses sufficient moisture and plant food, though they thrive best on sandy loam or gravel loam soils, and it is on these types that maximum crops of high quality potatoes can be produced.

If the land which is to be planted to potatoes is not likely to wash in the winter, plow in the fall to a depth from 9 to 10 inches if the character of the land will permit. Deep plowing insures a greater waterholding capacity. Spare no pains in fitting the land for planting. Thorough preparation is essential to large yields, advises the Department of Agriculture.

Should a poor sod land be selected for a potato bed, apply from 1,000 to 1,500 pounds of a fertilizer analyzing from 2 to 3 per cent of ammonia, 6 to 7 per cent of phosphoric acid and 7 to 8 per cent of potash. If a stubble or corn land is used increase the ammonia to 3 1-2 or 4 per cent. Half the ammonia should be derived from dried blood, tankage, or other organic forms and the other half nitrate of soda or ammonium sulphate.

Select a variety of seed potatoes which is known to do well in the locality. Some good varieties of the potatoes are Irish Cobbler, Early Ohio, Rose Pour, for early potatoes, and Green Mountain and Peerless for late growth. The importance of good seed can not be too strongly emphasized. In the first place, the seed should be free from varietal mixture and disease, and true to name and type. The tubers should be reasonable smooth and firm, with the first sprouts just starting into growth.

Plant these potatoes from 3 to 6 inches in depth depending on the nature of the soil. Plant shallow on heavy clay soils and deep on light sandy or muck soils. Plant in rows from 30 to 36 inches and from 10 to 14 inches apart depending on variety grown and the fertility of the soil. Early varieties can be planted closer than late ones. Cover seed with at least 3 inches of soil. If planted as outlined 15 to 20 bushels of seed potatoes per acre will be required.

Give first tillage before plants push through the ground. The aim should be to keep the surface of the soil loose and free from weeds. Continue cultivations at frequent intervals remembering to go shallower each time, and gradually narrowing the space filled. Potato plants are usually sprayed to protect them against leaf-eating insect pests or fungus pests. Protection against these insects is usually secured by some form of arsenical poison such as arsenate of lead, or paris green. The potato plant may be protected against fungus diseases by keeping its foliage covered with Bordeaux mixture.

Imaginary Heart Trouble.

Do you have pains in the region of the heart? Does your heart thump? Its terrible pounding alarms you? What is wrong? Do you believe these symptoms mean heart trouble? Organic diseases of the heart very seldom occasion much pain. Nearly all of these pains are caused by some derangement of the stomach. Meritol Tonic Digestive is especially recommended for indigestion and dyspepsia, and for restoring the stomach to its normal functions and—no more "heart disease." Owl Prescription Pharmacy, Frank D. MAKE MOVE FOR A CITY BEAUTIFUL

Oakland Women Inaugurate Movement to Clean Up City.

(Special to The Times.) OAKLAND, Cal., April 29.—Oakland club women have started a movement to enlist all the women and children in the city to clean up unsightly lots and plant trees and flowers.

Back of the move are the Native Sons and Native Daughters, women's clubs, men's and women's improvement clubs, and civic and commercial organizations. They will, they declare, make Oakland the most attractive city in the west before they finish, and entitle it to all that the name "City Beautiful" implies.

I hereby announce myself as a candidate for the nomination of Sheriff, on the Democratic ticket at the primary election. Mr. Hollister is a successful business man of Coos Bay; is a lawyer of repute, and is identified with every progressive movement of the people of Coos Bay have had for years. He is an honest citizen, a man whose purpose and ambitions in life are to do things for the betterment of mankind and the state in which he lives. He has never before aspired to any office in county or state. At present he is a member of the City Council of North Bend, to which high position he was elected by the highest majority of all members now serving; is a director of the First National Bank of North Bend and President of the Lane County State & Savings Bank of Florence. He has been a resident of North Bend eleven years.

We are certain from information at hand that never before has a cleaner or more progressive man ever come before the democratic primaries and we are equally certain that never before have we had the opportunity to place a democrat in congress that we now have. This man is a coast man, and never before has the coast asked for recognition. The interests of the coast are identical with the interests of the interior, but the advantage is to be had in sending a man to congress who is advised as to the needs and requirements of the coast, instead of one who has to depend on information furnished him by his political friends. If the rivers and harbors of our state are aided by the Federal Government, the benefit will be felt by the cities of the interior.

That great undeveloped county of Coos is solid for their home man and there democrats and republicans are working hand in hand to secure his nomination. The people there believe in him and are exceedingly anxious to see him receive the nomination. (Paid Adv.)
