

SUNNY SOUTH QUIET NOW

Editor the Coos Bay Times:
Please find enclosed one of Uncle Sam's due bills for \$1.50 for which please keep The Times headed my way. Your motto: "Get the news while it is still news" is true even in my case, though my papers are often two or three weeks late. I notice lots of news items of interest like, for instance, when George A. Baines discovered oil or gas—I expect it was gas—near his coal pile. I will begin watching the papers now to see if Charlie Powers gets pinched for selling bad watermelons. I haven't noticed anything about Charlie for some time—he is about due to get into print. Marshfield seems to be more quiet than it used to be. I expect the town has improved in appearance a good deal. I am going to try and get back one of these and see if I know it. Business considerably below the minimum just now and the outlook is discouraging. However, blackberries ripe—that will help. The Mexican situation is a back to Texas just now. It is all right, but just now had a president and a Blaine at Washington.

CATERPILLAR IS SPRING PEST

At Caterpillar, the boss little the fruit orchards, has been and bloom with reckless already this spring, and the agents say that it is high time to was him fore and aft.
The tent caterpillar, propagates with great rapidity and does most damage to the older and more or less neglected trees, although he does attack all kinds, the strong, rugged and healthy as well as the apple. His preference is for the apple.
Nick Johnson, county fruit inspector, said that the pest could be overcome by proper spraying. He gave the following formula:
Dissolve one pound of arsenate of lead in a half gallon of water and then add twenty gallons of water. Spray the foliage surrounding the tent caterpillars, keeping the well mixed while using.
A solution is highly poisonous to all animals. One Johnson, will kill in the days.
