What You Pay For And What You Get

Those people who have been induced to buy cheap pianos under the impression that they were practicing economy, on the whole have paid a high price, as their later experience will prove.

There is no magic in piano making which enables any manufacturer to turn inferior material, by the help of unskilled workmen, into good instruments. And yet only by the sacrifice of quality in both material and labor can pianos be produced to sell at the figures which are often quoted. The same common sense which governs your buying of other kinds of merchandise should rule in the selection of a piano. There is a price limit below which you cannot go without paying too much for what you receive.

There are pianos offered at lower figures than ours, but when we say that for every dollar you invest in one of our instruments you get a dollar's worth of piano value, we state a fact which you can prove by a visit to our store. Here are to be seen the broadest and the most select assortment of pianos and player pianos to be found in Southern Oregon.
