ROOSEVELT IS IN BAD HEALTH

Physician Says He Must Rest Four Months to Recuperate From His Hard Trip

(By Associated Press to Cross Bay Times.)

OYSTER BAY, June 27.—Four months of absolute rest has been prescribed for Colonel Roosevelt by his physician, who informed him he was suffering from enlargement of the spleen and loss of vitality as a result of malaria fever he contracted in South America.

Can't Quit Politics

"But in four months the campaign will be over," the Colonel said. Consequently he considered it impossible to follow the physician's advice. He abandoned, however, a campaign trip across the continent in September. Tuesday night he will make only one speech in Pittsburg, instead of two.

Malaria is Trouble.
The change in Roosevelt's plans came after an examination last night. The doctor urged him to give up the trip to Pittsburg and make no speeches during the campaign, and so far as possible give up everything else that would tax his strength.

Roosevelt today explained that the physician said it would require a long period to shake the effects of the malaria and if this is not accomplished, the disease might become so securely fastened on him that he would never recover his full strength. It might even impair his mental vigor, the physician said. Colonel Roosevelt declined to heed the warning.
