ORIGIN OF WALL PAPER.

Wall papers are now universally accepted by all classes of society as a mural decoration for enriching a plain plaster surface. It may not, however, be generally known that they are of comparatively recent origin. It is probable that when first introduced they were intended as cheap imitations of tapestry and other textile hangings, says the Decorative Furnisher.

EASY TO DARKEN YOUR GRAY HAIR

Try This! Mix Sage Tea and Sulphur and Brush it Through Your Hair, Taking One Strand at a Time.
When you darken your hair with Sage Tea and Sulphur, no one can tell, because it's done so naturally, so evenly. Preparing this mixture, though, at home is messy and troublesome. For 50 cents you can buy at any drug store the ready-to-use tonic called "Wyeth's Sage and Sulphur Hair Remedy." You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning all gray hair disappears, and, after another application or two, your hair becomes beautifully darkened, glossy and luxuriant. You will also discover dandruff is gone and hair has stopped falling.

Gray, faded hair, though no disgrace, is a sign of old age, and we all desire a youthful and attractive appearance, get busy at once with Wyeth's Sage and Sulphur and look years younger.

Charting Unknown Seas

THEN AND NOW
Years ago today the United States government sent out its scientific expedition for exploring and charting the Southern Ocean. The expedition consisted of five vessels, the largest of which was the Albatross, commanded by Commander Chas. D. Sigsbee. It was aboard the flagship, Albatross, which was to carry the expedition around the world during the next year. Rounding South America, after a leisurely journey which he stopped to explore unknown islands, he sailed along the coast of California at the time when it was under Spanish rule. He continued to the present states of Oregon and Washington. He arrived in Honolulu at the time when the Hawaiian Islands were about to be taken into the hands of the French. It was so evident that the United States would tolerate no event that Hawaii remain an American appanage. In 1823 the United States drew up a treaty with the Hawaiian Islands. It was one of its most valuable treaties. He displayed a force in the Philippines that the United States remained effective to force when the Americans came to Hawaii a half century later. His return he announced that he had discovered a new continent in the Antarctic regions which he named Wilkes Land. It was heralded with rapture and it became a subject of controversy.

Today practically all the world's seas have been charted, but about 7,000,000 square miles, or one-eighth of the total land surface of the earth, are still unknown to the white man. The American explorer stands vindicated and the Antarctic continent is an established fact. Explorers have not only proved that there is a Wilkes Land but have discovered the South Pole. The example set by Wilkes in the Antarctic has been emulated in the Arctic and today the North Pole is also an established fact. Today also, the Pacific Ocean is a great highway of commerce and its travel is based upon the accurate knowledge gathered by Wilkes. Every ship finding its way through the unlighted mazes of the South Sea is guided by the surveys of the "United States Exploring Expedition," as it has become known historically. The United States still has an unexcelled naval station in the mid-Pacific which is due to the blue-paper treaty with its quill-penned agreement drawn up by Wilkes and the barbarian chief. Because of the decisive action of the American explorer, Hawaii today is an American territory and not a French possession. The South Sea Island natives remember "the American," as they called Wilkes, to this day. According to their myths he taught them hospitality which they practice today by sending the fairest of their maidens to greet the stranger with yams and bamboo tubes of water.
