

COX TELLS OF MUCH TROUBLE

Marshfield Constable Says That Conditions at Lakeside Are Dangerous

Constable W. B. Cox returned today from a trip to Lakeside and the Ten Mile country, where he served some papers in civil suits. He says that conditions there are really dangerous.

Monday they almost had a riot and Olof Severson was compelled to close his saloon. Finally a revolver was taken from one man and a razor from another.

The trouble results from the rain stopping many of the railroad workmen who flocked to town and drank heavily. Mr. Cox says that most of the foreign element there carry knives or automatic pistols.

Dr. Straw also returned from Ten Mile and says there are many foreigners, representing practically all the nations of southern Europe, and he saw them on the rampage Monday.

A. F. Johnson has been appointed special constable for that vicinity. Constable Cox was appealed to for aid Monday evening in restoring order and did what he could. However, they have no jail there and all that an officer can do is to disarm them.

Pierson's Loss Small

Mr. Cox says that Milo Pierson sustained a very small loss when his store was robbed the other night. Among the articles taken were nine Ingersoll watches, two dozen \$3 razors, a case of briar pipes, some spectacles and some cigars. They did not bother the safe or the cash drawer, although there were a few dollars in cash in the drawer.

Ruby Morrison, who recently had a rather sensational clash with the Marshfield police, is now at Lakeside, Constable Cox says.

EASTSIDE WON AT BASKETBALL

Marshfield Defeated by Score of 21 to 14—Challenge For a New Game.

The basketball game between the Marshfield and Eastside teams, played last evening at Eastside, resulted in a victory for the latter with a score of 21 to 14.

Spectators state the game was as fast as could be expected, considering the size of the ball.

The Marshfield players say that Eastside plays a fast game, but attribute their defeat principally to the smallness of the floor and the extremely poor lights.

LaChapelle of Marshfield refereed the game.

The lineups and points scored by players are as follows:

Marshfield	Position	Eastside
Burroughs (8)	F	McKay (2)
Bradley (3)	F	Ragsdale (14)
Leedy (3)	C	Steele, Jube (2)
Bolt	G	Bryer (3)
Lyons, Capt.	G	Johnson, Cole

The Marshfield team today issued the following:

We, the undersigned members of the D. G. F. Club, of Marshfield, hereby challenge the Eastside Athletic Association to a basketball game, time and place to be settled by captains of teams.

Burroughs, Bradley, McDonald, forwards; Lyons, Capt., Chapman, Holt, Mussen, guards; Leedy, Hunter, centers.

PUPILS PASS STATE EXAM.

County Superintendent Baker Awards Diplomas to Eighth Grade Graduates

COQUILLE, Ore., Sept. 9.—The following is a list of those passing the recent state eighth grade examination:

Marshfield—Myrtle Isaacson, North Bend—Clarence Nygren, Jouna Inhoff, Margaret Hoeck, Olive Phillips.

Doings of the City Council

CITY TO RAZE OLD BUILDING DELAY CHANGE IN ORDINANCE

Council Instructs Health Committee to Destroy Old Shacks—Paving Job

Mayor Allen last night asked the City Council to take steps to raze a deserted house on South Eighth street, near Golden. He said that it had been vacant for several years and was a menace to the public health, many contagious diseases having been contracted there. The house belongs to Mrs. Armitage, who resides at Springfield. The health committee was instructed to inspect it and take steps to have it torn down and burned.

Warren Bros. Contract.
City Recorder Butler informed the City Council last night that he had not yet received a reply from the bondmen of Warren Bros. Construction Company. He notified them by letter that the company was not carrying out its contract and that they would be held liable.

Councilman Cople and Evertsen expressed indignation that Warren Brothers were not going ahead with the work.

Councilman Doll said that Supt. Ashby of Warren Brothers had informed him they were doing everything they could to get the work under way again, but said that they did not have the ready cash to care for the expenses and just now the banks were not financing payrolls. Mr. Doll said that Mr. Ashby had stated that he offered eight per cent to the local banks for money to finish the contract but was unable to get it.

Mr. Doll said that Supt. Ashby had informed him that they were arranging to fix up the concrete curb so that there would be no danger of damage from rains. City Engineer Buckingham stated that the curb had not been damaged by the last rain.

He said that Peart Brothers had some work to do after the fill along the curb was made and in consequence he had not sent in a final estimate on their contract, which is otherwise completed. Peart Brothers were present and stated that they were ready to do the work as soon as the fill was made.

Wharf Is Bad.
Councilman Evertsen reported that there were many defective places in the wharf along the waterfront and he thought that they should be repaired before there are accidents resulting from them. Councilman Albrecht said that City Attorney Gos had not rendered an opinion as to what rights the city had over the waterfront and until then he did not think that the city should go ahead with any repairs or improvements on the wharf.

City Engineer Buckingham stated that the private wharf near Alder street was in bad shape. He said that the new wharf in the rear of the city had been completed and that the Odd Fellows had repaired their adjoining wharf.

Improve Curtis Ave.
R. F. Williams urged that Curtis avenue, between Broadway and Second street be improved as quickly as possible in order to provide a good street to the postoffice. Owing to the proximity of the rainy season, Mr. Williams wanted it done by private contract, eliminating the delays that will result from it being built in the regular way by the city.

City Engineer Buckingham was instructed to take the matter up with the property owners and try and have it done by private contract. If he does not succeed the Council agreed to give Mr. Williams permission to go ahead with his share of the improvement.

Sewer Connection Hard.
A. J. Savage appealed to the Council to provide means for connecting his new residence in South Marshfield with the Fourth street sewer. Mr. Savage bought parts of four different lots so that his property fronts on Johnson avenue instead of on Fourth street and unless he gets permission from some of the property owners to cross their lots, he will have to build about 200 feet of sewer to connect up. He said that M. P. Burrows had refused permission, but he had not seen the others. Mr. Buckingham said that if Mr. Savage could arrange to get a sewer to Fourth street arrangements would be made for connecting up. The matter was passed over until Mr. Savage could confer with C. H. Lowrey or others regarding a right of way for the sewer.

For Ferry Street.
The ordinance providing for condemning a right of way over the Southern Pacific to connect up the two portions of Ferry street, which C. A. Smith ceded to the city, was adopted. The appointment of a committee of three to fix the damages was deferred until next meeting.

Bid in Property.
City Recorder Butler was authorized to bid in property on North Second street which is to be sold for the street assessment. The property is a portion of the Southern Oregon company holdings which was deeded to the Davis heirs in the recent litigation. The city can bid only the amount of the assessments and the costs of the sale.

Poutine Business.
Councilman Doll of the fire and water committee will ask bids from the coal dealers for supplying the city hall with coal for the winter.

Councilman Ferguson announced that he had arranged to have dirt hauled from Eleventh and Elrod to fill in front of the city hall so that

Proposed Amendment to Building Ordinance Referred to Committee to Consider

An amendment to the city building ordinance providing for the elimination of the fees on buildings which are being raised or lowered to conform with changes in street grades and also for moving structures, was tabled last night by the City Council until a committee could consider it. The provision for moving frame structures provided that the consent of a majority of the owners in the block in which it is moved and also the owners across the street from it must be secured, that is, within the fire limits.

The amendment was about to be put to a vote when Councilman Cople objected. He said that he thought they were a little hasty about the matter. He said that before it should be passed, a committee should look into it and see if it were just what they wanted and also to ascertain if there were any other changes in the ordinance that might be desired at this time. It was finally referred to the health committee.

Inspector Tribbey explained that he had not been charging any fees for permits for raising and lowering buildings unless other improvements were made or a basement added.

Adjourn Two Weeks.
The Council decided to adjourn until a week from next Monday night as there is no street work or other important matters to come up. Mayor Allen said that in case of anything developing he would call a special meeting.

Councilman Albrecht objected to the way the city light bill is increasing, saying that last month it was over \$500 and exceeding the appropriation for lights.

City Recorder Butler stated that more of the property owners on South Broadway were bonding for the improvement than had bonded for any other street improvement made during his tenure of office.

Concrete Approach Can Be Built for the Fire Engines.
Sewer Too Expensive.
Mr. Ferguson stated also that he had the street commissioner put in a temporary plank crossing at Hall and Broadway so that traffic could get through while the street improvement is being held up.

City Engineer Buckingham stated that Herman Hillier was anxious to get a sewer built so that his residence on Elrod near Eleventh could be connected up with it. Mr. Buckingham said that Mr. Hillier had complained that Buckingham had prevented the construction of the sewer, which he asked for a year ago, but Buckingham denied this. However, Mr. Buckingham said it would be difficult to put in the sewer because the south side of Elrod was too low to connect up and it would be very expensive for the number of places it would serve.

Drain Barry's Place.
City Engineer Buckingham reported that Contractors Perham & Gibley had cleaned the drain on North Eighth street so that the Barry property was no longer inundated. Councilman Wilson said that he had been informed that Mr. Barry was threatening to sue someone because water had been left standing on his place.

Hasten Streets.
Councilman Cople wanted to have the contractors who took the Eighth Terrace and Tenth street contracts hasten the work. He said that it would soon be winter and the work could not be done then. Mr. Buckingham said that the contractors had until some time in October to do the work. He pointed out that last year the street work was not nearly as far ahead as it is this year.

Mr. Buckingham said that Perham & Gibley would complete the grading on North Eighth street some time this week.

Councilman Ferguson wanted the Pine street improvement pushed as rapidly as possible.

COMMENCE NEW HOTEL

Architect Says Work Will Commence—Committee Appointed

At a meeting of the stockholders in the new hotel Gallier project Monday night it was found that a sufficient sum had been raised to warrant construction work and a committee consisting of Steve Gallier, R. H. Rosa, J. L. Kronenberg and Elbert Dyer was appointed to file incorporation papers, incorporating the proposition for the sum of \$75,000.

Active Work 15th.
In speaking with a World representative J. S. Atkins, architect and one of the stockholders, stated that active construction work on the first unit would commence on or near the fifteenth of the month. The unit will be of fireproof construction and will have a face brick front, the construction to be in accordance with the plans and specifications.—Western World.

OPEN COOS BAY LAND.
WASHINGTON, D. C., Sept. 9.—The Secretary of War has notified Senator Chamberlain that lands in the vicinity of Coos Bay, no longer required in connection with the harbor improvement, will be returned to the public domain.

SICSLAW JETTY WORK
From F. E. Leefe, government engineer in charge of the harbor improvement on the Siclaw, we learn that during the month of August, 15,170 tons of rock were deposited in the jetty by the contractors, Johnson-Anderson Company.

On the north side of the river the piling has been driven out to about No. 500, making it 1410 feet further out that the present end of the south jetty. It is not the intention to drive more piling this fall but to build up the work and put in enough rock so that the jetties will stand the storms of the winter without being damaged.

It is expected the present contract for jetty construction will be completed in November.

ADVERTISED LETTERS.
List of unclaimed letters remaining in the postoffice at Marshfield, Oregon, for the week ending Sept. 8, 1914. Persons calling for the same will please say advertised and pay one cent for each letter called for:

SALTS FINE FOR ACHING KIDNEYS

We Eat Too Much Meat, Which Clogs Kidneys, Then Back Hurts And Bladder Bothers You

Most folks forget that the kidneys, like the bowels, get sluggish and clogged and need a flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sorts of bladder disorders.

You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and is harmless to flush clogged kidneys and stimulate them to normal activity. It also neutralizes the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts is harmless; inexpensive; makes a delightful effervescent lithia-water drink which every body should take now and then to keep their kidneys clean, thus avoiding serious complications.

A well-known local druggist says he sells lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.

For sale by Brown Drug Company.
