STEAMER FOR SIALAW.

Tidewater Mill Company to Put on Vessel to San Francisco.

In the fall the Tide Water Mill Co. plans to place a steam schooner in the lumber trade between Florence, on the Siuslaw River, and San Francisco. The company has four small sailing vessels carrying lumber from there to the California metropolis—the schooners Hugh Hogan, Oakland and Sausalito and the barge Lawrence.

H. P. Dutton, at the head of the company, who has returned from a trip down the coast, says that the steam schooner for addition to the fleet either will be built or purchased. Last month the four vessels transported 2,599,000 feet of lumber to San Francisco. The capacity of the mill is 3,000,000 feet every thirty days.

A survey completed by the United States engineers shows that the channel at the entrance to the Siuslaw is fourteen feet deep at the low water stage, the best condition ever known.

The north jetty has been completed for a distance of 7710 feet and the south jetty more than 6000 feet. A sum of \$250,000 is available for their extension and it is anticipated that the funds will be ample to finish the projects.

WEALTH COMING IN

Tax receipts bulged considerably during the last three business days in August, most of the remittances being from those who had paid the first half of their taxes before April 1. The amount put on the books for those three days totals \$67,698.24; quite a pile of mail containing checks yet remains to be worked over.—Coquille Sentinel.

CLOSE RACES FOR PENNANTS

Boston and New York Battling For National League Honors—Other Leagues

(By Associated Press to Coos Bay Times.)

NEW YORK, Sept. 9.—Baseball interest during the week centered again on the remarkable struggle for the pennant in the National League. Sunday found New York and Boston deadlocked for the lead just as they were two weeks ago. Meanwhile the advantage has lain for the most part with the Giants, Boston having had a clear title to the lead only once at the close of a day's play. Saturday the teams drifted back to even terms again when the Giants dropped one game of a double header in Brooklyn, while Boston, half a game behind, was winning in Philadelphia.

Monday Boston jumped ahead again. Monday the two teams began a series in Boston which may tell heavily on their pennant prospects. Each team seems well prepared, the Braves having been conserving their star pitchers, Tyler, Rudolph and James, as much as possible, and apparently having them in trim for the battle, while the Giants are using their bats more effectively than for weeks past.

Of the remaining two members of the pennant contending quartette, St. Louis dropped off badly during the week, winning but one game in six, and despite a victory over Cincinnati Sunday, is six games removed from the leaders. Chicago has done better, but not so well as the leading pair and is four games from the top.

A little interest was injected into the American League race during the week by a spurt on the part of the Boston Red Sox. Their notable feat was the taking of four straight games from Philadelphia, reducing the league lead of the Athletics appreciably. There is still an eight and a half game gap between the two clubs.

Indianapolis had the better of the crucial series with Chicago on the latter's grounds in the Federal League race.

In the American Association, Milwaukee once more got into the pennant race. Meeting the league leading Colonels on the latter's own grounds, the Brewers trounced them in three out of four games and left Louisville Friday night two and a half games behind. The Colonels had won 81 and lost 61 on that date to the champion's 77 and 69.

NEW ORLEANS, Sept. 10.—Colonel Theodore Roosevelt delivered a public address in the opera house here, in which he urged that "this government, instead of paying \$25,000,000 blackmail to alien wrongdoers and their heirs," as proposed in the dispute with Colombia over the Panama Canal property, should "use that \$25,000,000 on the plant of the Panama Canal, and as many scores of millions as are necessary to take control of the Mississippi and to develop all its possibilities of usefulness, from the headwaters to the delta."
