SECTION OF NEW ROAD SLIDES INTO THE RIVER

A portion of the grade on the new road which is being built between Reedsport and the Schofield country along the Umpqua river, slid into the river, carrying away about 150 feet of roadbed. The slide occurred a few minutes after 4:15 portion of the road was completed, the men hardly getting away from the slide before it started, carrying large trees, logs, rock and brush far out into the river, causing a swell to raise which reached across the river, the water rising on the opposite shore to the height of eight feet. WHAT SAYVILLE MEANS.

To 999 of a thousand newspaper readers the date line "via Sayville, Long Island," means nothing more than if it had come from any unheard

of place at the antipodes. To the editor of the Sentinel it is different, for it recalls a year there as teacher of the village school forty odd years ago. Also sailing trips on the bay in an oyster boat and sampling the scores of acres of planted oysters, rides across the pine barrens, social festivities and whole volumes of other recollections.—Coquille Sentinel.
