Portland Livestock Show Success

THE Fourth Annual Pacific International Livestock. Exposition, held at North Portland December 7-12, was an excellent success notwithstanding the fact that all the breeding classes had been eliminated on account of the feeling among the

derful, the Herefords predominating, Short Horns following, one load of Angus was also shown. This year beside the fat carlots were shown carlots of feeders.

In quality the exhibit was much ahead of all previous exhibitions. The grand champion carlot went to Ed-ward Coles, of Halnes, Or., who has carried off this honor for the past three years. Mr. Coles was presented with a work was the presented with a gold medal by the association

in recognition of the achievement. In the single steer class the grand champion was awarded to the Univer-sity of Idaho on "George," a grade Angus weighing 1650 pounds.

Hogs.

The hog exhibit was truly a bean-tiful one to any hog fancier. Car-load after carload was shown by keen competitors. H. C. Anderson, Parma, Idaho, won first prize in the light hogs and Elgin . Forwarding Company, Joseph, Or., won first on car-lots of heavy hogs. The judge was certainly put to the test in selecting these carloads from such a large of-

these carloads from such a large of-fering of quality. It takes art to finish hogs such as these. The sheep show was not as large as the cattle or hog show, but was good as regards quality. Byron Van-decar, of Haines, Or., was winner of first prize and champion honors.

Student Judging Contest.

Perhaps the closest and one of the best educational features of the show each year is the students' judging contest. These contests are held under strict rules and are very keenly contested by the boys from the various colleges. Results this year were as follows:

Taxa and the second second																								911

The first auction sale-Wednesday was given over to the sale of exhibited stock in the cattle, hog and sheep classes, both single animals and carlots. Idaho's grand champion steer, "George," was first to the block and was finally sold to the Union Meat Company at 24 cents per Edward Coles' grand champound. pion carlot of steers were sold at 10.20c to the Union Meat Company.

The Harriman Club, 1000 strong, made this their special day and spent the afternoon in inspecting the stock. Many prominent officials of the road were in attendance.

The most successful Short Horn, sale ever held at the yards was con-ducted Thursday. Such prominent breeders as Minor, Brown, Dunn, Corbreeders as Minor, Brown, Dunn, Cor-nett and Chalmers contributed to the offerings. Clifton King, owned by means that they will quickly con Frank Brown, was sold for \$900; depend upon sliage and that the Roan Beauty, also one of Frank will soon become as common as Brown's animals, went at \$700; while Dunn's Roan Vietor went at \$600. The hog sale Thursday, Friday and Seems strange what process of Connects and the seems strange what process of

pany to give the exhibitors, leading stockmen and others prominently in-terested in livestock a banquet. This year's banquet was held at the Im-perial Hotel with covers for 300. O. M. Plummer was toastmaster and kept up, by his singular wit, the in-terest of the diners until the finish. Those who responded were D. O. on account of the feeling and the foot and breeders in regard to the foot and mouth disease. It may have been possible, though, that as a result the fat classes come in for a greater share of interest. This year's entries in the fat classes were much greater than in any previous year, making it the largest exhibition of market animals ever held in the West. Cattle Exhibit Excels. Eastern Man's System of

FOR several years we have harand filled one silo and a part of an-other when the cars were in the early est and best; the beautiful Kim- \$1000 and \$1250 player of glazing stage; leaving the rest of the balls, and the genuine Aut Kim- \$1000 and \$1250 player of crop to nearly mature before harvesting the most of the ears and putting the stalks into the silos.

I prefer to husk a portion of the ears, but many times when other farm work claims our immediate attention it hardly pays to go to the extra labor and expense of husking, grinding and feeding the grain separately. As a rule, we harvest a few hunderd bushels of ears from the field to feed our fattening hogs.

I have watched results very closely while feeding silage prepared both ways and find that changing from one kind to the other makes no noticeable difference in the milk yields of the cows. It is my judgment that it pays to harvest a portion of the ear corn before filling the sllos, that is, if the potato and apple crops are not

demanding our immediate attention. Farmers in many parts of the coun-try where Summer dairying is practiced have been slow to accept the "Gospel of Silage"; however, a trip through some of the dairy communities in New York and Western Pennsylvania shows that many new silos have been erected during the past two

These dairy farmers have kept their cows during the Winter without ex-pecting them to yield a heavy flow of milk and consequently have not fed according to approved dairy ideas. A change is gradually taking place and these men are turning to real dairy farming. This naturally real dairy farming. This naturally means that they will quickly come to depend upon silage and that the silo will soon become as common as the
