FASHION NOTES.

The reign of skimpiness is over. The skirts are growing wide and slender ankles seen before. Can now be tucked inside.

The sleeves unto the fingers reach. The collar has returned. And those who sneer and those who preach Believe their lessons learned.

They know not women if they feel Her natural bent to please Can be affected by her zeal Be checked by things like these

She follows fashions—and she will, For scoffs she cares no whit; She falters only when the bill Is sent with "Please remit!"

She may look foolish—does she care? She follows fashion while Her dearest friends would never dare To let her see them smile.

She'll brave the cold half clad, indeed, In order to be slim, And suffer, if there be the need, To charm some soulless "him."

The fashions come, the fashions go; For one thing are they meant— They frame the charms of woman so She's always different.

—Exchange.

SIX MONTHS before the great war broke out in Europe an American in Paris said to a Comtesse di Centanni in a tone of alarm: "Madame, Europe is dance mad."

"Yes," said she, "so is the United States. What of it?" "Madame," he said, "History teaches us that such wild epidemics and orgies of dancing are always followed by great wars. Dancing has something to do with war. The savage tribes always dance before going into battle. The Druids had their war dances before taking to the war trails. Our American Indians put on war paint and danced before they planned to scalp their enemies. Indian dancing was a part of their worship. In correspondence to the saying of prayers in the churches of Europeans before the troops went to battle. Why the expression of religious enthusiasm took the form of dancing I cannot say, but it did. Dancing is always the sign of great social unrest. When you have great social unrest you have war.

"Madame, I fear war. It is coming to the United States. It is coming to Europe. It is bound to come to one or the other first. There is a chance that the United States may avert war, but it is only a chance if the United States will take a lesson and change her ways. I repeat it again when you have great social and domestic unrest you are not far from chaos. I think the United States is not far from chaos."

The countess did not pay much attention to the agitation of the American, but now that Europe is steeped in war, she has changed her views. She is now in the United States while she has not divulged the name of the earnest American who forecast the European war six months before it came, she would save the United States from a similar calamity and is speaking her warnings.

The countess, before her marriage to the Frenchman, was an American girl, says an exchange, Josephine Ludwig. She naturally hopes the forecast for the land of her birth will not come true.

"I am sure the man had no inside glimpse of the secrets of fate," says the countess. "He merely made an assertion based on fact. He pointed out to me the facts of history as they came in rapid succession. First there is wildness. Then there is law. It seems to be a natural law, just as natural as the law that if any man does anything to excess he must suffer the consequences.

"Now that his words have come true I recognize the fact and recognize that the American people are drifting to where they cannot return. The people have gone from one dance to another with reckless abandon. They have danced wild and wilder dances and have reached the extreme."

History shows that when the pendulum swings too far in one direction it must swing back. Usually the swing back is accompanied with

war. Yet it may be that war is nothing to do with the swinging of the pendulum. There have been so many wars in the history of man that the swinging of the pendulum may have been only a coincidence.
