FISH DYNAMITED

DEPUTY GAME WARDEN THOMAS AFTER LAW BREAKERS

Use Explosive in River Above Powers and Banks Are Striven With Dead Fish, It is Said

Fish are being dynamited in the river above Powers and trouble with the law is liable to result, according to Deputy Game Warden Thomas who was here this morning. He said that evidence a plenty has been found showing the explosive was used and that two days afterward fish were still floating on the water and many were dead on the banks.

The use of explosives for fishing purposes is a clear misdemeanor and is an offense against which the law is particularly severe.

It is said that a stick of dynamite can kill practically all fish within a radius of 200 feet when exploded. The concussion is so great that the gall bladders of the fish are burst open, stated the Deputy Game Warden. He said that he cut many of the fish open and found this to be true.

Deer Season August 15.

Continual queries have come to Mr. Thomas asking when the deer season will open. He announces the date definitely as August 15, the season opening two weeks later than last year and closing at the same time, October 31. The shortening of the season was made at the instance of the timbermen, it is said, who showed that camp fires during the dry summer months very often started big forest fires.

This year hunters must have the head to identify the carcass with which they are found, says the Deputy Game Warden. The law is going to be followed strictly to the letter, he declares.

July 1 was the official ending of Mr. Thomas' term of office, as at this time a new Fish and Game Commission takes office and Deputy Game Wardens must either be re-appointed or new ones elected in their places. As yet Mr. Thomas has received no notification and now he is wondering whether or not he will be re-appointed.
