## Wash the Easy, Quick and Cheap Way

The old-fashioned way is an extravagant waste of a woman's time and strength. But that's not all. There are the clothes to be considered, too. It is not the wearing of clothes, nor the using of table and bed linen that wears them out so quickly. It's the weekly rubbing they get on the rough washboard.

### Use An Electric Washing Machine

and save the maid's strength and time for other duties about the house. And while she is so engaged the machine is doing all the real work. It does the washing more quickly. More than that it does better work—and without the slightest rubbing. This is one of the many ways in which Electricity saves time, money and strength in the home.

## FLAG STATION BECOMES CITY

**S** EVEN or eight months ago Hopewell, Va., was an obscure flag station on a branch line of the Norfolk and Western Railway some 15 miles from Petersburg. It was an unpeopled and practically unknown point out in a sleepy stretch of country where land could be purchased readily for \$50 an acre. Today it is a city of probably more than 18,000 persons, where small lots are being sold for as much as \$3,000 and \$4,000 each and in some cases rented for \$200, or more, a month. The situation is explained in an interesting illustrated article in the August Popular Mechanics Magazine. It says:

"Hopewell is a raw, wild, excited boom town with factories running day and night, with block after block of dwellings springing up as rapidly as a new street is marked off; with barracks, shacks, and tents everywhere, and hundreds more in the course of erection. Like Goldfield, and Gary in earlier days, it has dozens of saloons, fly-infested eating houses, and improvised stores where a gaudy outlay of goods is displayed on packing boxes in crude, hurriedly built shacks made of rough lumber. Its buildings are unscreened, and sanitation is unknown. Garbage is thrown into the street, and sewage carried off in open ditches. Drinking water is drawn from shallow wells. Flies swarm in clouds. Yet, in spite of all this, the town—which doesn't even know its real name and is called by a half dozen different ones—is one of the most interesting in America. Its population six months, or more, from now, it is estimated, may range between 25,000 and 35,000.

"War orders from Great Britain and her allies for ammunition and high explosives so completely swamped a large American powder company that it was compelled to increase its factory facilities. The city of Hopewell, Va., is the result. Shortly before the first of this year, agents for the corporation quietly purchased 1,200 acres of farm land adjacent to the flag station. This was inclosed by a 10-foot barbed wire barricade. Several hundred men were imported and set to work throwing up brick and concrete factory buildings. On April 1 the place had a population of 500 persons. On June 1 about 13,000 employes were listed on the company's payrolls and the inhabitants of Hopewell numbered approximately 18,000. Each day these numbers are increased.

Every minute of the day and night the factory site is patrolled by several hundred armed guards. No person other than an employe, unless he has a written permit issued at the main office of the company in Delaware, is allowed within the barricade. The output of the plant is not publicly known. Two factories are engaged in the manufacture of gun cotton and a third is producing cordite."

### WANTS MORE MONEY

Salvation Army Asks Additional Aid Because of War

(By Associated Press to Coos Bay Times.)  
LONDON, July 22.—The Salvation Army is making an appeal for \$750,000, an increase of \$300,000 over a year ago, to finance its social work connected with the war. Out of this money the Salvationists expect to allot \$50,000 for work among the soldiers and sailors, and \$55,000 is set apart for the relief of the army's sick and wounded, as 20,000 members are now serving with the British forces, exclusive of the Canadian, Australian and other colonial divisions.

Other sums allotted are \$75,000 for work among the homeless, \$100,000 for the training of Salvationist officers, \$130,000 for the maintenance of work in India and \$75,000 in Japan, Korea, Java, Africa and the West Indies. The rest is used in other charities and religious works.

During the past twelve months the Salvationists supplied more than 13,000,000 meals and 8,000,000 night's lodgings to the poor.

Every military camp or place frequented by soldiers has some kind of Salvationist work going on. But the recreation and social huts are maintained by the Young Men's Christian Association.

### ARGUES FOR PLANK

Bandon Paper Takes up Road Building Question.

Arguing in favor of the use of lumber for road construction the Bandon Western World makes the following statement:

"Outside of the wearing qualities of the proposed roads there is another feature in the plan that makes a strong appeal at this time. Approximately 31,680,000 feet of lumber would be used in the construction of the roads.

"To the average mind that figure does not mean a great deal, but in board feet placed end to end that amount of lumber would make a two-foot walk from Bandon to New York City, or a twelve-inch path practically a quarter of the way around the earth.

"However, we are not figuring on a sidewalk to the American metropolis, or a pathway to China. The taxpayer wants to know where he is going to gain by voting the bonds.

An order for 31,680,000 feet of lumber would keep a mill like the plant of the Moore Company running for 422 days. Now we are getting close to home and \$440,000 expended for roads begins to smell like prosperity at least it gives off an aroma like bread and butter.

"A local mill could not, of course, figure on more than one-half of the contract, but at that 211 days' work for 40 men would have a decided effect on business conditions.

"Averaging \$2.50 per day to the man, not less than \$21,100 would go to laborers in filling a contract for half of the lumber required. Outside of this would be the returns for the labor used in the actual construction of the roads."

### HAS ICE PLANT

Bandon Has New Industry Which Will Serve Public

A new industry at Bandon has been started, according to the following from the Bandon Western World:

"Sixty-five hundred pounds of ice every 36 hours is the capacity of the new plant just installed by the Bandon Laundry and operated for the first time this week. An addition 9 by 24 feet has been made to the main building. This is the freezing room, and contains the coil made in Bandon out of 800 feet of 1-4 inch pipe and 65 new cans in which the ice is frozen. Pure spring water, from a private source is used in making the ice and the product is most sanitary and healthful.

"The company now has investment of approximately \$1800, says Manager Deringer, and they expect to increase the scope of business by catering to shipments down the coast as well as to the residence district of the city. Beginning immediately regular bi-weekly shipments are to be made and the private homes will be taken care of in the future.

## VETOED BY MAYOR

OPPOSITION TO IMPROVEMENT WORK AT MYRTLE POINT

Council Reconsiders Action Regarding Paving But It Is Again Turned Down

(Special to The Times.)  
MYRTLE POINT, July 22.—At the regular meeting of the city council Monday evening, the street paving proposition was reconsidered and two resolutions for extension work were passed by the council on a second reading. The resolutions were vetoed by the mayor notwithstanding the fact that there were no remonstrators on one street and on the other they were in the minority.

Mayor Dement has taken a determined stand against all improvement work, thus far he has defeated paving resolutions for six different streets—aggregating about 22 blocks of paving. The mayor has intimated that there will be no improvement work in Myrtle Point unless engineered under the supervision of P. M. Hall-Lewis. Mr. Hall-Lewis was appointed city engineer by the mayor and his appointment rejected by the council with a vote of 6 to 0 while the property owners almost to a person have signified that the services of Mr. Hall-Lewis were not wanted.

Councilman Schroeder, Strong and Guerin have taken a stand favoring improvements in the way of a sewer system and street paving extension work, and, it is stated, they have the backing of the progressive property owners. Mayor Dement while standing alone in the council in his position against improvement, has been able to halt considerable work.

### VISITS ROSEBURG

"Jimmie" Richardson, Well Known Here, in Douglas County

The Roseburg News says: "Jimmie" Richardson, who has been associated with Walter McCredie, of the Portland baseball team for many years, and who has charge of locating prospective players, left for San Francisco Saturday night after a day spent in Roseburg visiting with his old time friend, William Hulien.

During his stay here Mr. Richardson conferred with a number of local players with regard to their qualifications for the big league. Just before leaving town Mr. Richardson informed friends that he did not believe any of the Roseburg players would be given a try-out at this time. He said one or two of them might be considered by McCredie later.

### OUTSIDE MONEY

Coquille City Will Soon Get Cash for the Bonds

The Coquille Herald says: "Present indications are that some \$30,000 of outside money will be turned loose in Coquille in about ten days. Sweet, Casey, Foster & Co., of Denver, who bought the city bond issue of the above amount sent the bonds here to be executed and signed by the mayor, recorder and treasurer, and the documents were signed up and sent back to the buyers yesterday. It is estimated that in about ten days the money will be available here for the taking up of outstanding warrants."

### WOMAN IN CHARGE

Lady Mackworth Will Conduct Big Coal Concern

(By Associated Press to Coos Bay Times.)  
LONDON, July 22.—Lady Mackworth, who was one of the survivors of the Lusitania disaster, has taken over the management of the Cambrian Coal combine, aggregating \$100,000,000 a year, during her father's absence in America on war work for the government. Her father, D. A. Thomas, is the head of the combine. His general manager, Leonard Llewellyn, has also been detached from the company's offices on war work.

### THREE GENERATIONS

DRESDEN, Germany, July 22.—A remarkable case of three generations in the field has just been discovered. The unusual honor belongs to the family of Kloetzer from Bockwa near Zwickau. Kloetzer, Sr., a veteran of the war of 1879, in which he won the Iron Cross second class, volunteered for service in his 67th year, at the beginning of the war, and went into the field as captain of the first company of the Zwickau reserve battalion. He has been advanced to major and has received the Iron Cross first class.

His son is in the field as captain of the 18th Uhlan regiment, and his grandson is lieutenant in the 32nd reserve artillery regiment. Both of the latter have been decorated.

### NEWS OF COQUILLE

Doing of County Seat People Told in the Sentinel

Rev. E. H. Moore preached his final sermon here as presiding elder at the M. E. church south.

Thomas R. Hanley, of Lampa, has recently installed mechanical milkers for James Jenkins, of Parkersburg; E. G. Kay, of Riverton; and Geo. Herrman, of the South Fork section.

Rev. H. M. Branham, of Medford, who was pastor of the M. E. church south in this city four years ago, spent four or five days here visiting old friends.

Rev. H. S. Shangle, of Milton, Oregon, financial secretary of the Columbia Junior college there, has been in this city for the past week and preached at the M. E. church south.

A reception was given Rev. and Mrs. F. S. Shimian at the Presbyterian church. Mr. Shimian has begun his pastoral work in Coquille.

It is possible that a lodge of the Moose will be organized in Coquille. The necessary members for a charter are now being secured.

### NEWS OF COQUILLE

J. W. Leneve and wife left for a week's outing in Curry County. Master Jack Hall accompanied them.

Rev. C. H. Bryan is expecting Rev. Gordon, a former pastor of the M. E. church of this place, who is planning to spend part of his vacation in Coos County.

Mr. and Mrs. Bert Folsom accompanied by Mr. and Mrs. N. N. Neiman left for Mr. Folsom's ranch at McKinley. Mr. Folsom intends to complete the logging off of the bottom land on his ranch.

Prof. Richards, of Bandon, was in town today and presented the sub-editor with a bunch of sweet peas which were winners of the second prize at the Sweet Pea carnival recently held at that city.

Mrs. W. H. Falkner and daughter Mrs. Fred Ehlers, both of Sioux City, Iowa, arrived here for a visit with Rev. and Mrs. C. H. Bryan. Mrs. Faulkner and Mrs. Bryan are sisters and had not seen one another for many years.
