ANNA BELLE Sees Them Thresh Wheat

Dear Friends—They've been threshing wheat down at Grandpa's and really it's great fun to watch the men cut the binds and stuff the wheat into the big thresher. The tiny grains of wheat come out in a stream at the side of the thresher and very soon a sack is filled and another brought to take its place. The straw or chaff as Grandpa calls it, is blown through a long tunnel called the stacker, which piles it very high. Grandpa explained everything, how flour is made from the wheat grains, and of course, it was up to Grandpa to tell how the good biscuits and cakes are made.

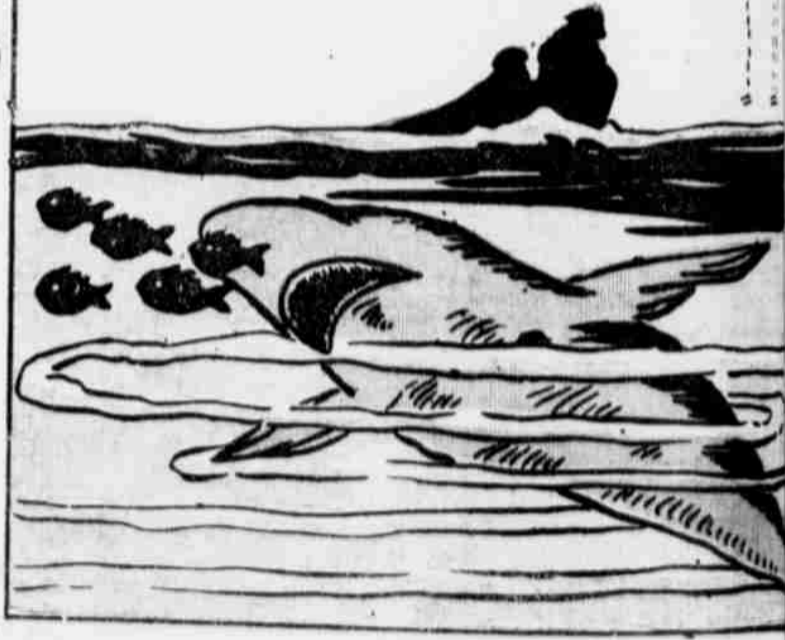

Hope you're doing fine in Society work, and if you haven't gotten your Certificate of Membership yet, just write me care this paper, enclose a two-cent stamp for postage and I'll be only too glad to send you one—
 Lovingly,
 Anna Belle
