BULGARIA HAS DECLARED WAR

Is Twelfth Nation to Enter Conflict and is on Side of Germany

NOTICE IS POSTED

Proclamation of Action Against Serbia Will be Made Public in that Country Tonight

INVASION IS ALREADY ON

Decision On Part of Bulgaria Made Only After Diplomatic Duel of Months Carried on by Representatives of Two Sides

WILL BE POSTED THROUGHOUT NATION

BUCHAREST, Oct. 13.—A dispatch from the Bulgarian frontier states that the declaration of war against Serbia will be posted throughout Bulgaria tonight.

LONDON, Oct. 13.—Bulgaria has declared war on Serbia, says a Central News dispatch.

The decision of Bulgaria, the twelfth nation to enter the war, to join the ranks of the belligerents on the side of Germany, Austria and Turkey, was reached only after a diplomatic duel was waged for months between the representatives of the Teutonic allies and those of the quadruple entente.

Bulgaria ordered a mobilization of the army September 21. Bulgarian troops actually invaded Serbia about 24 hours before war was declared.

HAS BEEN ISOLATED

Since Second Balkan War Bulgaria Has Stood Alone

Since the second Balkan war, in which Bulgaria fought Greece, Serbia and Montenegro, after the victory of all four nations against Turkey, Bulgaria has been isolated to a certain extent from the other Balkan states.

The second war, which resulted from a dispute as to the division of the territory won from Turkey, ended with Rumania invading Bulgaria and forcing the latter to make territorial concessions.

When peace finally was restored, Bulgaria was compelled to relinquish a large part of the territory she gained. Her feeling thus aroused was the basis for Bulgaria entering the war against Serbia.

The first important victory of German diplomacy was scored when Turkey was induced to cede Bulgaria territory along the Dedegach railway. Bulgaria also is said to have been pledged efficient help in obtaining the whole of Macedonia and part of Dobruja.

TEN MILL TAX LEVY

NORTH BEND CITY FATHERS ADOPT 1916 BUDGET

Levy Limit Allowed by Charter—lose \$4800 in Liquor Licenses and Must Economize

Voting a 10 mill levy, the maximum under their charter for general municipal purposes, the North Bend council adopted their 1916 budget. The total sum for city purposes is \$22,140, and this includes \$14,701 for general municipal purposes and \$8000 for the sinking fund and interest.

The fact the city loses some \$4,800 in liquor licenses and at the same time is restricted by the charter from increasing the tax levy, makes strict economy necessary, stated C. E. Maybee, city recorder, this morning.

A special meeting of the council will be held tomorrow night to consider several revisions in the charter, among them a clause allowing sidewalks and street work to be advertised in one contract.

An ordinance was passed for the sale of \$17,145 improvement bonds for the paving complete on Sherman and Washington streets.

REGISTRATION HAS MADE WORKMEN LEAVE

Irish Labor has Gone From Part of England Where They Were Needed for Harvest

(By Associated Press to Coos Bay Times.)

MANCHESTER, Eng., Oct. 13.—In Cheshire and Lancaster Counties on the west coast, the farmers rely largely on Irish laborers for the harvesting of their grain crops, but this year the supply of this labor has been seriously depleted by the departure of most of the laborers for Ireland, in order to escape the National Register.

The farmers gave the laborers every possible assurance that the registration did not involve them in any fresh responsibilities and did not mean impending conscription. The men, however, seemed to be convinced that the registration form meant that in some way they would be placed under the eye of the government and sooner or later snatched for military service. In most parts of Ireland registration is not required.

Twice Philadelphia took the lead only to be tied, and Harry Hooper finally clinched it for Boston by smashing a home run into the right center field stands.

Lewis a Hero Also

Duffey Lewis was another hero for Boston, his home run in the eighth sending in a run ahead of him and tying the score when it looked like Philadelphia would win a victory.

Governor is There.

As Boston took the field to practice, Governor Brumbaugh of Pennsylvania, with his party, entered the gubernatorial box near Boston's bench.

The Governor was greeted by former Governor Tener, now president of the National League, and while the two shook hands, the crowd cheered.

Marshfield continues to work hard to secure for 1916 the Oregon State Bankers' Convention. Portland a short time ago was asked to waive her rights and now Secretary John W. Motley, of the Chamber of Commerce, has addressed a letter to Will T. Wright, a personal friend and vice president of the Scandinavian-American bank in Portland asking him to exert his influence to bring the bankers here.

Mr. Wright is former State Banking Superintendent and it is expected he will be able to do much in changing the place of the convention.

A short time ago an invitation was forwarded to J. M. Poorman, of Woodburn, president of the Association asking him to take the matter up with the committee. It was pointed out then that the railroad will be completed in here by the date of the meeting and would give the bankers a chance to look over this section.

CHINA PRODUCES MOST OF ANTIMONY

(By Associated Press to Coos Bay Times.)

HANKOW, China, Oct. 13.—As a result of the interruption of the German industries, China has unexpectedly become the chief producer of antimony and Hankow is China's chief antimony center.

Before the war there was one antimony plant in Hankow and it was not operated. Now it is working and two others have been established.

More than half of the 40,000 tons of antimony required by the world last year was produced in China, chiefly in Hankow. The price of the metal is uncertain at all times and is now three times as great as before the opening of the war.

Antimony is chiefly used in peace times by the printing trade. A slight amount of the metal is necessary in making type. It is also required in treating lead for use in ammunition, but the proportion demanded is very slight. Ore from which antimony may be obtained is available in several parts of China, but in ordinary times the amount of the metal necessary to supply the world is not sufficient to justify big operations.

For the entire empire in 1913 there were 5.11 doctors for every 10,000 inhabitants. In the big cities there was 9.6 physicians for every 10,000 persons, and in the country 2.5 for the same population.
