A man has to be pretty well covered with moss not to be a regular advertiser. Here is another case of the value of advertising. A family down in Florida lost one of their children. After failing to find it for two days, they put a twenty-five cent notice in the paper and the next morning they were surprised to see an alligator upon the door step, where he had disgorged the child alive, and then died himself. They sold the alligator's hide for \$5, and the parents are exhibiting the child in a dime museum for \$50 per week. The story illustrates the value of advertising. It also illustrates the writer as a careful and painstaking liar.

A Good O. P. Item. A Boise City dispatch reads: Some time ago E. W. Hadley, receiver of the Oregon Pacific, wrote to Mayor Pinney of Boise, for maps and other information regarding this section of the State. The request was complied with. In a letter acknowledging the receipt of the documents, Mr. Hadley says of the Oregon Pacific: "During all its vicissitudes, I don't think it was ever so near construction and extension toward the promised land of Eastern Oregon and Boise as it is at the present moment, and I feel sure if we all put our shoulders to the wheel with a long pull and a pull altogether, we shall ere long be making the dirt fly in your direction." The fact that such a statement is made by the receiver is thought to indicate that strong parties are preparing to take hold of the road with a view of pushing it eastward to a connection with the Burlington, or some other trunk line.—Ex.

### Marine Notes.

The steam schooner Alice Blanchard is afloat all safe without much straining. Capt. Hollar, agent for the Underwriter, superintending the work.

She will make some repairs to her machinery and proceed to San Francisco in a few days.

All Yaquina Bay requires now is a dry dock and we would have the best port on the coast. We will recommend this as a port of refuge for vessels in need of anything, even several capable masters to navigate them if such an article is required.

We see by the Oregonian of the 20th, that the "old salts" on Yaquina Bay predicted that the Alice Blanchard would never come off the sand where she drifted with the tide a few days ago. Who ever made that assertion never was pickled very long or else the rainy weather has soaked him fresh. The vessel went on with the falling tides and any person that knows anything about the tides could plainly see that with the spring tides the ship would come off herself if left alone. Employ a marine reporter Mr. Scott, you live too far from salt water or your reporter does not know neap-tide from spring-tide.

The Alice Blanchard never was in a dangerous position while on the sand in Yaquina Bay, when she laid on the sand spit.

Capt. L. E. Davis lands teams and passengers through the summer months at low tide from his side wheel ferry boat and they don't get their shoes soiled.

It seems that the Yaquina Bay must have a large number of enemies living near it. If a rancher happens to run aground on the tide land in the fog the entrance to the harbor gets a black eye. Visit some other ports on the globe then you will say Yaquina Bay is far above the average.

For Sale.—A well improved ranch of twenty acres, situated about half way between Toledo and Yaquina, about half tide land; has good frame house of 6 rooms, good barn, and other outside improvements. Good orchard of over 100 trees just in bearing, good garden land, well cultivated. Will be sold at a decided bargain, and on good terms. For further particulars call at or address this office.
