looses from her moorings, breaking the lines and a hawser. The work of discharging consumed seven hours over chedule time, with a loss of about \$300 worth of hawser.

An ordinance has been passed at Pasadena stipulating that beer and wine can only be served with 25-cent meals, and only between the hours of H:30 and 1:30 and 5:30 and 7:30, and providing for a fine of not less than \$100. nor more than \$300 for each violation.

The Anti-Debris Association in meet ing at Sacramento adopted resolutions in opposition to the Caminetti mining bill. The association does not believe the bill that a very few should receive a uniwill protect the land and rivers from injury, and proposes to appeal to the whenever such injury becomes apparent.

The Lamarietta vineyard at Fresno last season brought two carloads of boys from San Francisco, and set them to picking grapes. The boys' ares ranged from 14 to 18 years. Some of them ran off, and some landed in jail, but the general result was satisfactory. picked more grapes than an equal num per of Chinese and for less money. is probable that the experiment of las this summer.

At a meeting of Mayor Ellert and number of citizens the other night it was decided definitely to hold a midwinter fair in San Francisco, and it was charge of a committee of eleven to be appointed hereafter. The committee will neet Manager Cornely upon his arrival from Chicago, and with him begin actual preparation for the enter-prise. Much cuthosiasm was mani-lested at this meeting, and a spirit of confidence was shown that money can raised, sufficient interest enlisted and all things necessary be done, even in the short time between the present and the close of the Columbian Exposi tion to make the fair a success,

A gentleman of Olympia, Wash., has power of Tumwater, a suburb, in gener ting electricity for the work of dredg ng Olympia harbor and redeeming the tide lands. At low water the falls at Tumwater produce 9,000-horse power, and a proposition for the utilizing of this power has been made to the company controlling it. The dated the light dredger company have asked the light and power company for a formal proposition to furnish 200-horse power by electricity with which to finish their overnment contract in the harbor.
The plans for the harbor improvement
are elaborate as proposed by the Harbor
Line Commission and approved by the War Department. The area of the long wharf, a distance of about a mile from the city front, covering an area of about six blocks at the south end and tapering to about 1,000 feet at the end of the long wharf. Surround ing this will be a reserved strip of 300 feet for piers. To the west of this will be the harbor proper. Extending down run the Northern Pacific track and an avenue 150 feet wide. On the east side a water-way is proposed, with a 300-foot facturing sites. The Tunwater water-ministration with carrying out the vond Capitol Point, where the new Statehouse is to be built.

#### FROM WASHINGTON CITY.

Superintendent Stump has decided that aften emigrant cattlemen must pay a head tax and are subject to the laws as regards inspection, unless they are regularly employed on the vessel as

The coast-defense ship Monterey will be officially accepted, and the Navy De-partment will assume control of her imaediately, paying over to the contractor all of the reserve fund that has been ield up as a guarantee of the completion of the vessel.

The United States government through Secretary Gresham has declined to act as arbitrator between France and Siam in the dispute between those countries as to the jurisdiction over territory near Slam. The intervention of this governnent was asked by Siam.

A statement prepared by Commis-sioner of Internal Revenue Miller shows that the collections of internal revenue for the eleven months of the current fis-cal year amounted to \$145,682,390, an increase over the corresponding period of the last fiscal year of \$7,457,403.

Upon the recommendation of Comnissioner Lochren of the pension office secretary Smith has dropped from the rolls of the pension office the names of wenty-eight special examiners now in the field, the terms of their one-year apintment having expired. All the spe cial examiners dropped are Republicans. Of the ninety special examiners still re-tained sixty are Republicans and thirty Democrats.

The government is not disposed to ac-ept as final the decision of the United States District Court at Seattle, Wash. that it has lost entire power to contro the use of the lands of the Puyaliup Indians near Tacoma by reason of the al-lotment of the lands in severalty, and Attorney-General Olney has given in-structions to the United States District Attorney at Scattle to make an appearance immediately in behalf of the Indian Agent.

One of the first matters of importance that will be presented to the next Con-gress will be the bill, already framed providing for the establishment of a Na-tional Board of Health, with headquar-ters in Washington City. The board, as devised by the projectors, is to co-operate with the State and municipal authorities in the matter of sanitary improvement. The boldest feature of the proposition and one that is likely to result in a seri ous controversy, is that which bestows upon the board legislative, judicial and executive powers of an independent

It is a matter of surprise among a large number of army officers that so many should be willing to accept details at Indian agencies. It has already been explained that these officers are willing to go to Indian agencies in order to get rid of disagreeable associations and the dull routine of camp, but another factor which would seem to deter them from going to agencies is the fact that all officers are now examined for promotion, and that they would be much more apt to be promoted if they continued in the active service instead of going away from it. It is claimed that all army officers

who accept Indian agency details will keep up their studies on military mat-ters, so that they may be able to pass the examinations when promotions are offered them.

The Interior Department has again placed itself on record as opposed to the higher education of Indians at the government's expense. Some days ago Mrs. Sarah T. Kinney in behalf of the Connecticut Indian Association asked authority to place Manila Cornelius, an Ohio Indian and a graduate of the school, in the Connecticut normal training school at New Britain, Conn., during the fiscal year ending June 30, 1894, at the rate of \$164 per annum, in order that she might be fitted as a teacher. Acting Secretary Sims in denving the the corresponding week of 1892.

A heavy ground swell at Port Los
Angeles (Santa Monica) tore the Corona
loose from her moorings, breaking the
March, 1891. In that letter Secretary Noble took the ground that it is best to prepare the Indians for labor and selfsupport by a good, ordinary common-school education, and when that has seen attained to place them upon lands r in other places of labor, and not keep them for many years still studying the higher branches of learning. More-over, he says, there are great numbers of children of the Indians who have no opportunity for education whatever. They need this elementary education, and the funds designed for Indian edu cation should be expended in a way to reach the greatest number rather than versity training.

## CHICAGO EXPOSITION.

In a North Dakota exhibit at the fair there are 146 exhibits of wheat and 200 cinds of grain. The gates of the fair grounds at Chi cago are to be kept open until II o'clock at night hereafter.

The expected World's Fair traffic from Europe has thus far failed to materialize. while the Eastward travel seems to b indiminished.

Paymaster General Stewart has completed a statement of expenditures of the naval review. The total expense of the review was \$76,800.

Internal revenue officers actually eized a miniature distillery on exhibi tion at the World's Fair, because all of the red-tape technicalities had not been complied with in setting it up.

The exposition authorities have set apart October 20 to 24 for the big re-union of war veterans, both Confederate and Union. The Grand Army posts will make efforts to bring all the old soldiers possible to Chicago.

Another attraction is being arranged by the exposition authorites and the people of Midway Plaisance. It is proposed that all the natives take part in a grand ball, to be given the first week in July. The ball proper is to be preceded by a grand march and the exhibition of all the strange dances to be seen on the

The Methodists will not withdraw their exhibit from the World's Fair After three hours' discussion a commit-tee decided to cover up all exhibits of the church Sundays, and all members of the church are asked to do the same with their individual exhibits.

Canada outstripped her competitors in the June exhibit of cheese. There were 667 exhibits, mostly of factory cheese. Of these 135 scored high enough win medals or diplomas, 126 of being Canadian manufacture. Thirty-one Canadian lots scored higher than any from the United States, ranging in

excellance from 90 per cent down. The council of administration will hereafter have full authority over all matters of general administration con-nected with the exposition, The nected with the exposition. The directors have adopted the report of the

FARM AND GARDEN.

Utilize Dead Leaves, Cornstalks and All Rubbish.

STRAWBERRY LEAF ROLLER.

The Safest Investment That a Man Can Make is to Buy Good Real Estate-Etc.

We do not believe in root-pruning for the corn crop. As the roots develop the cultivation should be more and more shallow until at the last it consists in

merely stirring the surface soil. Dead leaves, cornstalks and all rubbish which will decay may be disposed of bets ter than by burning. This by making into a compost heap, which in future value to the gardener will repay all the

The corn crop must make its growth in a comparatively brief time. See then that you help it to the utmost by careful and clean cultivation. Unless it is envery important matter of "clearing up." Don't begin anything else until you have

> granary. A man who permits fence rows to harbor weeds cannot maintain a reputation as a good farmer. It either proves that he is very slack in his methods or that

There is a little time in early summer when even the best farmers are apt to per get rushed, because the weeds grow so fast. Rather than let them get ahead of you it will pay to hire extra help for awhile. The crops will be enough better

> ax and not a gain to own it. should not be anxious to sell out, even if they do have a poor year or two.

In discussing the question of good roads not enough attention is paid to the methods of preserving them after they are made. Wide tires on the wagons are important to this end. In France, where they have the best roads in the world, four-inch to six-inch tires are common. If you practice level cultivation with the potato crop, you will simplify your abor and follow a sensible method. In

rain and repeated as often as necessary. It is a good check for potato-vine disease. PERFECT BUTTER AT ONE OPERATION. If a little skill is developed in making, washing, salting, working and packing outter at one operation, the results are op with a cloth wet in some of the brine

ket is in the producers holding their butter for some reason until it has lost its fine flavor." STRAWBERRY LEAF ROLLER.

times all the foliage is destroyed, and even the plants are killed. This is one of the most destructive of the strawberry insects. The larvæ is a little more than one-third of an inch long, in color from a yellowish brown to dark green. The larva changes to a pupa within the folded leaf late in June, being about one-fifth inch in length and pale brown in color. The moths emerge early in July, and measure nearly one-half an inch across the expanded wings. They are a reddish brown. Eggs for the second brood of larvæ are deposited late in July, and the larvæ feed in the folded leaf the same as those of the first brood. They become full grown in September, when they change to the pupe in the leaves and in this state remain during the winter, emerging as moths in spring. In South-ern Illinois there are three broods. The second brood of larvæ may be reduced in number by spraying the leaves of the strawberries with arsenical poisons or powdered heliebore at the time the young larvæ are appearing and before the leaves are folded; but a better way to destroy this pest is to mow the field after the crop of berries is off, and after letting it stand a few days to dry burn it over, adding straw where the leaves are few in order that it may be thoroughly burned. This will not injure the plants, and will effectually destroy the leaf roller.

Miss Emersonia Russell - Don't you

He Was Short Three Dollars. A twelve-year-old Auburn boy rapped at the teller's wicket of an Auburn bank the other day, called the cashier up and asked for the loan of three dollars with which to buy a bicycle. He was that much short and had heard that they

labor that you put upon it. The first spring work consists of the

the farm does not pay well enough to al-low putting any labor upon such use-

to pay the expense. There is no piece of land upon the

farm but that can be put to some profit-able use. If too rough to cultivate, rent it to a good flock of sheep. If you don't fancy that, plant it with forest trees. Don't let it remain idle, for then it is a About the safest investment that a man can make is to buy good real estate. This is particularly so if the land is productive and not idle. For this reason farms are good investments, and farmers

level culture everything but the digging is easier, and this is not so difficult as to be an objection. One of the best preventives of mildew on plants is powdered lime. It should be dusted over them when wet with dew or just after a rain and repeated as often as accessory.

quite satisfactory. John Gould describes his process as follows: "Taking slightly acid cream, put it in a revolving churn, and churn it until it begins to show signs of breaking, when a little weak brine should be added to the cream to assist in the separation. When the but-ter grains are the size of small shot and before taking out any buttermilk add two-thirds as much cold water as there butter, etc., in the churn. Agitate a ittle, draw off this diluted fluid and repeat until the water comes clear. Then let it drain in a churn for a short time, and then add the salt by the use of a little wooden fork. Let the butter re-main undisturbed for a half hour, when the cover is put on and the churn slowly revolved for five or more minutes. Then take this fork and break up the butter balls that have formed in the churn, and iberate the buttermilk inside of them. Then rechurn, and at the conclusion of the operation pack the butter into the little pails by adding a pound or so at a time, turning off the moisture each time until the pail is full. Then cover the that came from the churn, and sprinkle on dry salt and put on cover; and, if the butter cannot be sold that day, put it in as cool a place as possible, and first opportunity, not that it must be, but the great damage to the butter mar-

This insect attacks the leaves of the strawberry, drawing together the two halves of a leaf with a web; then the inclosed upper surface is eaten away so that it withers and turns brown. Some-
